4. Refer to the above data. If a new production technique is developed that enables a firm to produce 20 units of output with 3 units of land, 3 of labor, 1 of capital, and 2 of entrepreneurial ability, this technique would:
  - not be adopted because, although it reduces production costs, it does not increase profit.
  - be adopted because it would lower production costs and increase economic profit.
  - not be adopted because it entails higher production costs than other available techniques.
