Resources in Education, 1988 Quantifying Uncertainty in Subsurface Systems Céline Scheidt, Lewis Li, Jef Caers, 2018-06-19 Under the Earth's surface is a rich array of geological resources many with potential use to humankind. However extracting and harnessing them comes with enormous uncertainties high costs and considerable risks. The valuation of subsurface resources involves assessing discordant factors to produce a decision model that is functional and sustainable. This volume provides real world examples relating to oilfields geothermal systems contaminated sites and aquifer recharge. Volume highlights include A multi disciplinary treatment of uncertainty quantification Case studies with actual data that will appeal to methodology developers A Bayesian evidential learning framework that reduces computation and modeling time. Quantifying Uncertainty in Subsurface Systems is a multidisciplinary volume that brings together five major fields information science decision science geosciences data science and computer science. It will appeal to both students and practitioners and be a valuable resource for geoscientists engineers and applied mathematicians. Read the Editors Vox eos.org editors vox quantifying uncertainty about earths resources Advances in Computerized Scoring of Complex Item Formats Brian E. Clasper, 2014-07-16 This special issue was motivated by the move from research to operations for computerized delivery and scoring of complex constructed response items. The four papers presented provide an overview of the state of the art for such applications. The issue begins by describing the range of computer delivered formats and computerized scoring systems that are currently in use. The remaining papers provide three views of validity in the context of computer delivered and scoring assessments. It is hoped that together these articles will provide the reader with both an appreciation of the state of the art for computer automated scoring systems as well as a perspective on the issues that must be considered and the evidence that must be collected to produce automated scoring systems that allow for valid inference.
