Montano, 2023-09-01 Performance artist Linda Montano curious about the influence childhood experience has on adult work invited other performance artists to consider how early events associated with sex food money fame or death ritual resurfaced in their later work The result is an original and compelling talking performance that documents the production of art in an important and often misunderstood community Among the more than 100 artists Montano interviewed from 1979 to 1989 were John Cage Suzanne Lacy Faith Ringgold Dick Higgins Annie Sprinkle Allan Kaprow Meredith Monk Eric Bogosian Adrian Piper Karen Finley and Kim Jones Her discussions with them focused on the relationship between art and life history and memory the individual and society and the potential for individual and social change The interviews highlight complex issues in performance art including the role of identity in performer audience relationships and art as an exploration of everyday conventions rather than a demonstration of virtuosity Performance artist Linda Montano curious about the influence childhood experience has on adult work invited other performance artists to consider how early events associated with sex food money fame or death ritual resurfaced in their later work The Talking to Artists / Talking to Programmers Wendy Despain, 2016-12-19 Artists and programmers often work together on complex projects in stressful environments and things don't always go smoothly Miscommunication and misunderstandings are common as these two disciplines often use the same words to mean different things when they talk to each other Unintentional slights can turn into long held grudges and productivity grinds to a crawl This is a flip book that contains two narratives in one Turn the book one way and read one perspective turn the book over and upside down and read the other perspective The narratives can be read separately one after the other or in alternating chapters Talking to Artists Talking to Programmers can help anyone who wants to improve communication with artists and programmers It's set up like a foreign language dictionary so it addresses the cultural norms attitudes and customs surrounding the words each group uses so you'll know not just what the words in the glossary mean you'll know why they're used that way and how to get communication flowing again It addresses common reasons for communication problems between these two groups and provides specific suggestions for solutions The unusual format allows for each side to be given equal weight learn how to talk to artists starting on one side of the book turn it over and learn how to talk to programmers The whole book stresses the things artists and programmers have in common Focused primarily on videogame developers it

also applies to other fields where tech and art have to work together including web developers and teams building mobile apps Anyone who wants to communicate better with programmers or artists this book can help Features Lists of common problems and strategies for solving them Specific ideas for building bridges between departments Case studies from real teams Glossary of terms causing the most confusion Explanations for common friction points Approaches for fostering goodwill Solutions for team dynamics problems Specific suggestions for providing feedback Ideas for holding successful meetings

Imperfect Things Tiffany Gholar,2014-03-24 In 2010 I got my own art studio I finally had a space dedicated to making artwork But was following my dreams worth the risk Would I ever find the right audience for my work Could I stay motivated to keep painting despite all the times I returned from shows with unsold artwork and an empty wallet With everything else falling apart how would my artistic vision come together This is the story of three years in my life when everything changed

Artistic Thinking in the Schools Pamela Costes-Onishi,2019-07-11 This book examines current context specific trends and developments in empirical research on arts education and arts in education in order to evaluate and create responsive approaches to future global challenges By highlighting the centrality of the arts in advancing future orientations in education it offers a timely and valuable contribution to educational issues on preparing teachers and learners for the increasingly complex societal dynamics and unpredictable global economy
