Art Under Attack:

Art Under Attack Tabitha Barber, 2014-11-04 Published to accompany a major exhibition at Tate Britain this fully illustrated catalogue explores the history of attacks on art in Britain from the reformation of the sixteenth century to the present day demonstrating how religious political moral and aesthetic controversy can become arenas for assaults on art Through eight essays the broad subject of iconoclasm is broken into three overarching themes the state sanctioned iconoclastic zeal of religious reformers who aimed to purge both churches and minds of the sin of idolatry the symbolic statue breaking that accompanies political change such as the targeted attacks on cultural heritage by the suffragettes and attacks on art by individuals stimulated by a moral or aesthetic outrage Importantly the aim of the study is to present the rationale of iconoclasm its significance to the history of an object and how it has become a productive and transformational practice for some modern and contemporary artists Publisher's description *Art Under Attack*, 2013 *Artists on the Left* Andrew Hemingway, 2002-01-01 Examination of the relation between visual artists and the American communist movement in the first half of the twentieth century from the rise in prestige of the party during the Great Depression to its decline in the 1950s Account of how left wing artists responded to the party's various policy shifts the communist party exerted a powerful force in American culture *Artistic Freedom Under Attack*, 1995 *How Photography Became Contemporary Art* Andy Grundberg, 2021-02-23 A leading critic's inside story of the photo boom during the crucial decades of the 1970s and 80s When Andy Grundberg landed in New York in the early 1970s as a budding writer photography was at the margins of the contemporary art world By 1991 when he left his post as critic for the New York Times photography was at the vital center of artistic debate Grundberg writes eloquently and authoritatively about photography's boom years chronicling the medium's increasing role within the most important art movements of the time from Earth Art and Conceptual Art to performance and video He also traces photography's embrace by museums and galleries as well as its politicization in the culture wars of the 80s and 90s Grundberg reflects on the landmark exhibitions that defined the moment and his encounters with the work of leading photographers many of whom he knew personally including Gordon Matta Clark Cindy Sherman and Robert Mapplethorpe He navigates crucial themes such as photography's relationship to theory as well as feminism and artists of color Part memoir and part history this perspective by one of the period's leading critics ultimately tells a larger story about the crucial decades of the 70s and 80s through the medium of photography **American Journal of Science and Arts**, 1875 **Iconoclasm and the Museum** Stacy Boldrick, 2020-09-24 Iconoclasm and the Museum addresses the museum's historic tendency to be silent about destruction through an exploration of institutional attitudes to iconoclasm or image breaking and the concept's place in public display Presenting a selection of focused case studies Boldrick examines long standing desires to deface dismantle obscure or destroy works of art and historic artefacts as well as motivations to protect and display broken objects Considering the effects of iconoclastic practices on artworks and cultural artefacts and how those

practices are addressed in institutions the book examines changing attitudes to the intentional destruction of powerful artworks in the past and present It ends with an analysis of creative destruction in contemporary art making and proposes that we are entering a new phase for museums in which they acknowledge the critical roles destruction and loss play in the lives of objects and in contemporary political life Iconoclasm and the Museum will be important reading for academics and students in fields such as museum and gallery studies archaeology art history arts management curatorial studies cultural studies history heritage and religious studies The book should also be of great interest to museum professionals curators and collections management specialists and artists

Portraits in Early Modern English Drama Emanuel Stelzer, 2019-05-14 Portraits in Early Modern English Drama studies the complex web of interconnections that grows out of the presentation of portraits as props in early modern English drama Emanuel Stelzer considers this theory from the Elizabethan age up to the closing of the theatres This book examines how the dramatic text and the subjectivities of the dramatis personae are shaped and changed through the process of observation and interpretation of pictures in the dramatic actions and dialogues Unlike any previous study it confronts when a portrait is clearly meant not to be a miniature This also has bearings on the effect of the picture on the audience and in terms of genre expectation Two important questions are interrogated in the book What were the price and value of these portraits and What were the strategies deployed by the playing companies to show women's portraits in a theatre without actresses This book will be of interest to different areas of research dealing with the history of drama and literature material and visual culture studies art history gender studies and performance studies

Museum Activism Robert R. Janes, Richard Sandell, 2019-01-10 Only a decade ago the notion that museums galleries and heritage organisations might engage in activist practice with explicit intent to act upon inequalities injustices and environmental crises was met with scepticism and often derision Seeking to purposefully bring about social change was viewed by many within and beyond the museum community as inappropriately political and antithetical to fundamental professional values Today although the idea remains controversial the way we think about the roles and responsibilities of museums as knowledge based social institutions is changing Museum Activism examines the increasing significance of this activist trend in thinking and practice At this crucial time in the evolution of museum thinking and practice this ground breaking volume brings together more than fifty contributors working across six continents to explore analyse and critically reflect upon the museum's relationship to activism Including contributions from practitioners artists activists and researchers this wide ranging examination of new and divergent expressions of the inherent power of museums as forces for good and as activists in civil society aims to encourage further experimentation and enrich the debate in this nascent and uncertain field of museum practice Museum Activism elucidates the largely untapped potential for museums as key intellectual and civic resources to address inequalities injustice and environmental challenges This makes the book essential reading for scholars and students of museum and heritage studies gallery studies arts and heritage management and politics It will be a source of
