

GS 11.9.2 Project: Performance Task: The Subway Stop

Geometry Honors
Points Possible: 150

Project

Name: *Amber Beer*

Date: *5-20-2021*

The Scenario: The city subway is being extended to include a new stop in a large open plaza. The entrance to the new stop needs to be architecturally distinctive and energy efficient, but it also needs to fit within the budget. As part of your summer job with the Department of Transportation (DOT), you've been asked to review design ideas from three different firms and recommend which firm should be chosen to develop its idea into a full design proposal.

The Project: Use the information provided in the Performance Task to learn more about the proposed designs, the requirements the structure must meet, and the estimated project costs before you recommend which architectural firm should fully develop its proposal.

The questions below will help you gather information and prepare your recommendation. Remember to show your work.

The Plaza (information when you click on Proposals)

1. What is the area of the entire plaza? (1 point)

$$a = l \cdot w$$

$$a = 300 \text{ ft} \cdot 200 \text{ ft}$$

$$a = 60,000 \text{ ft}^2$$

2. What is the area of the plaza available for the subway entrance? (1 point)

$$a = l \cdot w$$

$$a = 200 \text{ ft} \cdot 200 \text{ ft}$$

$$a = 40,000 \text{ ft}^2$$

Examples of Analytical Geometry of Three Dimensions - Isaac Todhunter, 2007-02-01 An unabridged reproduction of the fourth edition with all text and any figures digitally enlarged Multidimensional analytic geometry Karol Borsuk,

Analytical Geometry of Three Dimensions Duncan M'Laren Young Sommerville, 1972 **Solid Analytical Geometry and Determinants** Arnold Dresden, 2007-03 PREFACE THE Author of this very practical treatise on Scotch Loch Fishing desires clearly that it may be of use to all who had it He does not pretend to have written anything new but to have attempted to put what he has to say in as readable a form as possible Everything in the way of the history and habits of fish has been studiously avoided and technicalities have been used as sparingly as possible The writing of this book has afforded him pleasure in his leisure moments and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general This section is interleaved with blank sheets for the readers notes The Author need hardly say that any suggestions addressed to the case of the publishers will meet with consideration in a future edition We do not pretend to write or enlarge upon a new subject Much has been said and written and well said and written too on the art of fishing but loch fishing has been rather looked upon as a second rate performance and to dispel this idea is one of the objects for which this present treatise has been written Far be it from us to say anything against fishing lawfully practised in any form but many pent up in our large towns will bear us out when we say that on the whole a days loch fishing is the most convenient One great matter is that the loch fisher is depend ent on nothing but enough wind to curl the water and on a large loch it is very seldom that a dead calm prevails all day and can make his arrangements for a day weeks beforehand whereas the stream fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river it is quite another matter to arrange for a days river fishing if one is looking forward to a holiday at a date some weeks ahead Providence may favour the expectant angler with a good day and the water in order but experience has taught most of us that the good days are in the minority and that as is the case with our rapid running streams such as many of our northern streams are the water is either too large or too small unless as previously remarked you live near at hand and can catch it at its best A common belief in regard to loch fishing is that the tyro and the experienced angler have nearly the same chance in fishing the one from the stern and the other from the bow of the same boat Of all the absurd beliefs as to loch fishing this is one of the most absurd Try it Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy or even a cast similar to those which a crack may be using and if he catches one for every three the other has he may consider himself very lucky Of course there are lochs where the fish are not abundant and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught and where each has a fair chance Again it is said that the boatman has as much to do with catching trout in a loch as the angler Well we dont deny that In an untried loch it is necessary to have

the guidance of a good boatman but the same argument holds good as to stream fishing Examples of Analytical Geometry of Three Dimensions Isaac Todhunter,1864 **Projective Methods in Plane Analytical Geometry** Charlotte Angas Scott,1894 *Analytical Geometry of Two and Three Dimensions* Apurba Narayan Das,2013 The book is meant to introduce all the basic topics of Analytical Coordinate Geometry of Two and Three Dimensions to the students of all leading universities

Elements of Analytic Geometry Simon Newcomb,1885 **Plane and Solid Analytic Geometry** William Fogg Osgood,William C. Graustein,1930 **The Elements of Plane Analytic Geometry** George R. Briggs,2015-06-14 Excerpt from The Elements of Plane Analytic Geometry A Text Ncluding Numerous Examples and Applications and Especially Designed The design of this book is to present the elements of Analytic Geometry in a simple form for the use of beginners With this object in view I have tried to make the demonstrations thorough sometimes at the expense of brevity in order that the student may never feel that the fundamental truths have been in part assumed Therefore it may often seem best to the teacher to present special cases of the theorems as preparation for the general demonstrations of the book The text has been interspersed with a large number of examples and applications to familiar theorems of Geometry often accompanied with the answers and hints for the solution to stimulate the interest of the student and to teach him early how to work for himself For the same purpose the chapter on Loci has been introduced About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works Elements of Analytic Geometry Alexander Ziwet,2000
