Journal Development Ashok Yakkaldevi, **Confronting the Sacred: Durkheim vindicated through philosophical analysis, ethnography, archaeology, long-range linguistics, and comparative mythology** Wim van Binsbergen, 2018-05-06 With *Elementary Forms of Religious Life* 1912, the sociologist Émile Durkheim formulated the most influential social science theory of religion to date. Pivotal are the paired concepts sacred/profane, the notion of collective representations, and the hypothesis that through such religious symbols, society compels its members to venerate herself, i.e. to submit to the social as an irreducible instance in its own right. Having grappled with this Durkheimian inheritance for half a century, the anthropologist of religion and intercultural philosopher Wim van Binsbergen, in this book, traces his own steps in confronting Durkheim's sacred through theoretical criticism, through ethnographic application to popular Islam in the segmentary social organisation of the highlands of Northwestern Tunisia, and by state-of-the-art long-range methods of linguistic and comparative mythological analysis. Thus, much to his surprise, he demonstrates the continued validity of Durkheim's insights in religion.

Analysis of the Balanced Scorecard as a strategic controlling instrument with an example from the insurance industry Alexander Merl, 2007-08-01 Bachelor Thesis from the year 2007 in the subject Business Economics Business Management Corporate Governance grade 1.7 University of Applied Sciences Neuss FOM Fachhochschule für Ökonomie Management Neuss language English abstract In view of the growing competition, the increased change in customers' wants, and the potential of new communication and information technologies,

more and more companies are faced with the need to permanently adjust and further develop their processes products and offer To be able to exist in the market a company must be in a position to recognise future developments early and include them in the strategy A company should therefore use management instruments which make it able to adjust strategies quickly and communicate them transparently in the whole company There is increasing criticism of the classical controlling instruments It is argued that controlling is supposed to provide management relevant data for the management which do not only include financial historical information as so far but also include future related non monetary figures Against this background the Balanced Scorecard BSC is becoming more important It extends the previous focus on finance issues to assess the performance of a company with a range of other aspects and ratios The customer perspective the internal process perspective and the learning and development perspective are supposed to be considered equally next to the financial perspective in the BSC The targets of this thesis are split into a main target and a sub target The main target of this paper is split again into two parts The first part of the main target is to show and to explain the relevant theoretical framework of the BSC in particular to strategic controlling The second part of the main target is to analyse the BSC as a strategic management system and to give an overview about this strategic controlling tool as it is seen in academic literature The sub target of this paper is to provide a link between theory and practice by applying the theory to a current example taken from the insurance industry The result is a recommendation for a BSC as a strategic controlling instrument for that specific insurance company With this specific BSC for an insurance company comes also a tool for a well structured evaluation of the chances and risks involved with its application Writing and Life Don Knefel,1986 **Papers on psycho-analysis** Ernest Jones,1919
