Analytical Vs Argumentative Research Paper:

Journal Development Ashok Yakkaldevi, **Introduction to Graduate Research and Writing** Nancy Engler, Lynn Oborn, 1998 [How Students Write: A Linguistic Analysis](#) Laura Louise Aull, 2020-04-01 Broad generalizations about people today are a familiar feature of first year student writing How Students Write brings a fresh perspective to this perennial observation using corpus linguistics techniques This study analyzes sentence level patterns in student writing to develop an understanding of how students present evidence draw connections between ideas relate to their readers and ultimately learn to construct knowledge in their writing Drawing on both first year and upper level student writing the book examines the discourse of students at different points in their education It also distinguishes between argumentative and analytic essays to explore the way school genres and assignments shape students choices In focusing on sentence level features such as hedges perhaps and boosters definitely this study shows how such rhetorical choices work together to open or close opportunities for thoughtful exchanges of ideas Attention to these features can help instructors foster civil discourse design effective assignments and expose and question norms of higher education **Demystifying Academic Writing in Higher Education: A Process View on Academic Textual Production** Xinghua Liu, Rui Alexandre Alves, Angelique Aitken, Josef Schmied, 2025-10-30 Academic writing in this Research Topic refers to the type of writing demonstrating students disciplinary knowledge of and proficiency in synthesizing analyzing and responding critically to new information Hyland 2004 Swales 1990 which may include those genres like course essays project reports research proposals lab notes journal articles conference paper theses and dissertations As the current workplaces have become increasingly specialized higher education worldwide has been increasingly charged with the task of developing students academic writing and correspondingly on students parts learning through writing has been necessary for them to succeed in higher education To prepare university students for writing challenges during the past decades numerous studies have been devoted to the study of linguistic and rhetorical resources in students academic writing under such umbrella terms like style reader awareness authorial voice writers identity stance evaluation textual structures steps and moves Charles Hunston Hinkel 2002 However previous research on academic writing has been predominantly focused on the linguistic and rhetorical aspects namely the final product of students writing while the nature and processes of composition students engagement and individual differences and the influence of contextual factors like emerging technology have been under explored Thus the goal of this Research Topic is to bring a process oriented and dynamic perspective to the study of textual production in academic contexts by both encouraging an expanded view of existing research paradigms and also welcoming novel approaches Data can be collected by using corpus building interviews and questionnaires but we would also welcome the use of experimental methods and a mixed method approach for data collection Meanwhile previous research mainly studied university students who were learning English as a second or foreign language hence we also welcome research examining first language writers and

students who are learning a second or foreign language other than English We believe for the study of the complex phenomenon like academic writing no single method or tool can suffice Therefore we strongly recommend a more creative perspective in data collection and analyzing and interpreting academic writing Papers can present quantitative data analyses based on experimental design or qualitative data analyses stemmed from more ethnographic oriented research Systematic review studies are also welcome We encourage contributions related but not restricted to the following topics

- 1 Cognitive processes in academic texts planning composing and revisions and student writers individual differences
- 2 Metacognition and self regulation in academic texts planning composing and revisions and student writers individual differences
- 3 Motivation and self efficacy in academic texts planning composing and revisions and student writers individual differences
- 4 Linguistic and rhetorical choices identity construction and disciplinary knowledge construction
- 5 Student writers textual production peer feedback and interactions with discourse communities
- 6 Affordances and challenges of artificial intelligence AI in the process of academic textual production in higher education
