The book reviews philosophy, culture, and programmes in science education for the gifted in diverse national contexts and includes scholarly reviews of significant perspectives and up-to-date research methods and findings. The book is written in a straightforward style for students studying international perspective modules on undergraduate but especially masters and doctoral degrees in Science Education and Gifted Education. Gifted education has come to be regarded as a key national programme in many countries and gifted education in science disciplines is now of major importance to economic and technological development. Despite these national initiatives and developments, there are very few discussions on gifted education in science from international perspectives. This will be a valued addition to the scholarship in this emergent field. **Catalog of Copyright Entries. Third Series** Library of Congress.
