### Historical Perspectives

#### Maternity Nursing

- Childbirth is usually a normal, healthy event in the life of a family.
  - Childbirth affects the entire family, and family restructuring is required.
  - Families are capable of making decisions about care, provided they are given adequate information and professional support.
- Traditional hospital setting—labor, birth, recovery, and postpartum care occur in separate rooms; delay of parent-infant contact.
  - LDR rooms—labor, birth, and immediate recovery occur in a single room, with transfer to a postpartum room for continuing care; emphasis on keeping parents and infant together; liberal visiting.
  - LDRP rooms—same as LDR rooms except that mother and infant remain in the same room where birth occurred.
  - Birth centers—freestanding centers that provide antepartum, intrapartum, postpartum, and newborn care to low-risk mothers and babies; typically staffed by certified nurse-midwives.
  - Home births—birth occurs in a familiar setting with support people the mother wants; fewer nurse-midwives now attend these births because of malpractice insurance problems.

#### Pediatric Nursing

#### Current Trends in Maternity and Pediatric Care

- For maternity care, prospective payment plans have resulted in shortened length of stay after delivery. This created problems for some women and infants who required readmission following early discharge. Legislation now mandates length of stay following vaginal birth as 48 hours; following cesarean birth, length of stay is 4 days. Concerns about managed care in pediatrics include delay in treatment authorization and pediatric referrals and limited coordination with community health, education, and social services.
