Each lab contains an introductory overview, a preparation tools required section, explanations of commands, and step-by-step instructions to reinforce the concepts introduced in the online course and covered in the Companion Guide. NEW Challenge labs written by Academy instructors tested in their classrooms will be included as additional or alternative labs. The Study Guide section is designed to provide additional exercises and activities to reinforce students' understanding of the course topics, preparing them for the course assessments. As a study guide, it will also continue to provide ample writing opportunities to guide students into the habit of keeping notes on networking topics.      **Cisco Networking Academy**

**Program** Jim Lorenz, Cisco Systems, Inc., Cisco Networking Academy Program, 2001 This lab companion helps you become familiar with the basic peripheral components of a PC computer system and their connections, including network attachment. You also examine the internal PC configuration and identify major components. You observe the boot process for the Windows operating system and use the control panel to find out information about the PC. Knowing the components of a PC is valuable when troubleshooting and is important to your success in the networking field. For some students, this lab is a review.      **The**
