Abstract: *Staphylococcus aureus* is a common cause of nosocomial infection. The purpose of this study was to determine the prevalence of *S. aureus* in the hospital environment. A total of 100 samples were collected from the hospital environment. The results showed that 60% of the samples were positive for *S. aureus*. The most common isolates were from the hospital environment. The results of this study suggest that *S. aureus* is a common cause of nosocomial infection in the hospital environment.
