Lewy, 1991-04-10 The International Encyclopedia of Curriculum is a unique collection of analytical and empirical studies on curriculum related issues. Its 280 articles authored by experts from 22 countries are grouped in two sections. The first Curriculum as a Domain of Enquiry contains articles dealing with general topics in this field. The second Specific Study Areas contains articles on more than 120 subjects currently taught in schools. It is the first attempt to provide in a single volume a comprehensive review of approaches and problems related to teaching traditional school subjects such as mathematics, history and classical languages as well as the innovative ones such as film studies, women's studies, communication skills, set theory in mathematics and energy education. The book is an invaluable tool for educationists, educational administrators, supervisors, researchers, policy makers and curriculum planners and a source of information and inspiration for teachers and school level curriculum co ordinators.

Leonardo, 2002 International journal of contemporary visual artists *Rotterdam Dialogues* Zoë Gray, 2010 This book juxtaposes three distinct agents in the art world: the critics, curators and artists. Of its title adopting the conversational form of three large scale symposia that took place at Witte de With Center for Contemporary Art in the fall of 2008 and the spring of 2009. In addition to transcripts from selected dialogues and the outcomes of three guest led workshops, it also contains spirited contributions that arrived from many of the participants in the months that followed the Rotterdam dialogues, opening another dimension of the discussions held in front of a large audience. At stake here are questions of cultural agency, audience and production ranging from the concrete to the speculative.
