Zakrajsek, 2023-07-03. The goal of teaching online is fundamentally the same as teaching face to face, facilitating the learning of all students to the greatest extent possible. This book differs from other books on online teaching in that in the process of offering guidance on course design and planning, developing outcomes and appropriate engaging activities, managing the workload and assessment, the authors pay explicit attention throughout to the distinct and diverse needs of students and offer effective strategies to accommodate them in a comprehensive and inclusive way by using the principles of Universal Design for Learning. By following those principles from the outset when planning a course, all students will benefit and most particularly those whom the research shows have the greatest achievement gaps when taking online courses: males first generation and low income students, those from underrepresented minority groups, the academically underprepared students with disabilities and those with limited online access or lacking readiness for online learning. Beyond good planning and design, Kelly and Zakrajsek offer ideas for creating inclusive course environments and activities such as using culturally appropriate content and making it accessible in multiple formats. They also share methods to foster faculty-learner interaction and increase personal connections with students and among students through group activities or learning communities which are so critical to motivation and success. Faculty new to online teaching as well as more experienced readers will find a wealth of practical guidance on developing and honing both fully online and blended courses and as importantly a wealth of proven ideas to help the new generation of students with diverse needs to succeed.

Elementary Algebra with Early Systems of Equations Tom Carson, Ellyn Gillespie, 2005-02. Tom Carson engages students in the learning process by meeting them where they are and leading them to where they need to be through the determination of their individual learning style, the development of study skills and the integration of learning strategies that help each student succeed. Elementary Algebra with Early Systems of Equations is a book for the student. The authors goal is to help build students confidence, their understanding and appreciation of math and their basic skills by presenting an extremely user

friendly text that models a framework in which students can succeed. Unfortunately, students who place into developmental math courses often struggle with math anxiety due to bad experiences in past math courses. Developmental math students often have never developed nor applied a study system in mathematics. To address these needs, the authors have framed three goals for Elementary Algebra: 1. reduce math anxiety, 2. teach for understanding, and 3. foster critical thinking and enthusiasm. The authors' writing style is extremely student friendly. They talk to students in their own language and walk them through the concepts, explaining not only how to do the math but also why it works and where it comes from, rather than using the "monkey see, monkey do" approach that some books take. Elementary Algebra with Early Systems of Equations as the title implies places the topic of Systems of Equations early in the text in Chapter 5. This organization is ideal for those instructors who prefer to teach systems of equations immediately following the chapter on graphing and the chapters prior to polynomials and factoring. For those who prefer to teach the topic later, Elementary Algebra by the same author team places Systems of Equations in Chapter 8. Foundations of Algebra, Solving Linear Equations and Inequalities, Problem Solving, Graphing Linear Equations and Inequalities, Systems of Equations, Polynomials, Factoring Rational Expressions and Equations, Roots and Radicals, Quadratic Equations. For all readers interested in elementary algebra, **Intermediate Algebra** by Tom Carson, Ellyn Gillespie, Bill E. Jordan, 2005. Intermediate Algebra is a book for the student. Elementary and Intermediate Algebra by Marvin L. Bittinger, David J. Ellenbogen, Barbara L. Johnson, 2004. **Journal of Developmental Education**, 2015. *Audiotapes* Bittinger, 2002-08.
