**Effectiveness of Air Force Science and Technology Program Changes** National Research Council, Division on Engineering and Physical Sciences, Air Force Science and Technology Board, Committee on Review of the Effectiveness of Air Force Science and Technology Program Changes, 2003-07-11 Under mandate of Section 253 Study and Report on Effectiveness of Air Force Science and Technology Program Changes of the Fiscal Year 2002 National Defense Authorization Act the U.S. Air Force contracted with the National Research Council (NRC) to conduct the present study. In response to the NRC established the Committee on Review of the Effectiveness of Air Force Science and Technology Program Changes composed of academics active and retired industry executives former Air Force and Department of Defense (DoD) civilian executives and retired general officers with acquisition and science and technology. These factors include threat assessment budget constraints technology opportunities workforce and program content. Given the relatively short time available for this study and considering the detailed reviews conducted annually by the Science and Technology (S&T) program was necessarily beyond the committee's purview. Rather the committee focused on S&T management including areas that have been studied many times in depth by previous advisory groups. Besides addressing technical content those prior studies and congressional concerns highlighted four overarching S&T issues advocacy and visibility planning workforce and investment levels. In response the Air Force instituted changes in S&T management. The NRC is requested to conduct a study to determine how changes to the Air Force science and technology program implemented during the past two years affect the future capabilities of the Air Force. Effectiveness of Air Force Science and Technology Program Changes reviews and assess whether such changes as a whole are sufficient to ensure the following: A That concerns about the management of the science and technology program that have been raised by the Congress the Defense Science Board the Air Force Scientific Advisory Board and the Air Force Association have been adequately addressed; B That appropriate and sufficient technology is available to ensure the military superiority of the United States and counter future high risk threats; C That the science and technology investments are balanced to meet near mid and long term needs of the Air Force; D That the Air Force
