Aerospace, 1988 **Critical Lapses in Federal Aviation Administration's Safety Oversight of Airlines: Abuses of Regulatory Partnership Programs** James Oberstar, 2009-12 Hearing to review the results of an oversight investigation

Two FAA Aviation Safety Inspectors have provided evidence raising serious questions of conduct violating the Federal Aviation Regulations FARs in the inspection and maintenance program of Southwest Airlines. SWA FAA employees have engaged in conduct which constitutes a violation of Federal law rule or regulation and gross misconduct, an abuse of authority and a substantial damage to public safety. The Maintenance Inspector for SWA knowingly allowed the airline to operate in March 2007 and possibly beyond and well after the inspection deadlines on a mandatory FAA Airworthiness Directive. There may be a pattern of regulatory abuse and that these regulatory lapses may be more widespread. He Ren, Xi Chen, Yong Chen, 2017-03-19. Reliability Based Aircraft Maintenance Optimization and Applications presents flexible and cost effective maintenance schedules for aircraft structures, particularly in composite airframes. By applying an intelligent rating system and the back propagation network BPN method and FTA technique, a new approach was created to assist users in determining inspection intervals for new aircraft structures, especially in composite structures. This book also discusses the influence of Structure Health Monitoring SHM on scheduled maintenance. An integrated logic diagram establishes how to incorporate SHM into the current MSG 3 structural analysis that is based on four maintenance scenarios with gradual increasing maturity levels of SHM. The inspection intervals and the repair thresholds are adjusted according to different combinations of SHM tasks and scheduled maintenance. This book provides a practical means for aircraft manufacturers and operators to consider the feasibility of SHM by examining labor work reduction, structural reliability variation and maintenance cost savings. Presents the first resource available on airframe maintenance optimization. Includes the most advanced methods and technologies of maintenance engineering analysis, including first application of composite structure maintenance engineering analysis integrated with SHM. Provides the latest research results of composite structure maintenance and health monitoring systems.
