

Installation Guidelines

Congratulations on choosing ALPINE PLUS for your flooring. Please read all instructions before you begin so improper installation will avoid warranty. When properly installed and cared for, your new flooring will be easy to maintain and look great for years.

Please ensure the floor is smooth to within 3mm over 3m as per AS/NZS 4511:2004 2013 code standards.

BEFORE YOU START:

- Plan for adequate expansion joints around the perimeter of the room – a max of 1mm but no less than 3mm per running metre, or a 15mm running floor required 15mm expansion minimum, or 1mm each end.
- We recommend that Oils or the equivalent, be installed 10days off the clean floor in accordance with Council requirements.
- If carpeting or sticking is pre-installed, an Alpine floor should be used to mask the expansion gaps. If this cannot be used, a composite adhesive can be used with a non expansion gap of the greater of either, 15mm or 3mm per running metre.
- Ensure the room temperature does not exceed the allowable temperature range of between -2 to 35 degrees Celsius.

TOOLS AND MATERIALS NEEDED:

- Tape Measure
- String line
- Square or Rule
- Utility knife
- Spill
- Spacers – eg 10mm
- Glue
- Rubber Mallet
- Composite Adhesive, eg Mowat Cure
- Alpine Plus Stone should be used in front of each stone in high use that allow for the required 15mm expansion

INSTALLATION PROCESS:

- Before commencing laying, take time to plan the installation from where it will be seen from the most.
- Place full planks in the areas of greatest traffic flow and cut at the least seen areas.
- Where possible, install planks parallel to the direction of light.
- Consider the placement of expansion joints, should the room exceed 20m in any direction. (See section under Expansion Joints).
- Clear your room of furniture, appliances, skirting/ mouldings and baseboards (skirting board).
- Ensure the floor is level, clean and structurally stable otherwise the floor will fail.
- Using string lines, square up to corner along the length and width of your room as a starting point.
- Measure the area you plan to cover, and adjust your starting point or cut the first plank so you start and end up requiring lengths less than 30cm or planks less than four ends.
- Boxes should be kept for and not used on their sides.
- Alpine Plus can be installed in a floating method however in direct sunlight and heavy furniture areas such as hallways, you are required to adhere the flooring using an acrylic/EPI adhesive.
- Carefully remove all skirting prior to laying.
- When installing, or re-installing the skirting board onto the Alpine Plus flooring, a minimum gap of 1 to 5.5mm must be maintained between the bottom of the skirting and the Alpine. This gap must remain clear to allow for expansion and not filled with adhesive or grout filler. We recommend the use of a 1 to 1.5mm spacer to maintain the separation.
- Once work should be subject to your floor can expand and contract, freely (in consideration when installing stone composite flooring).
