**Advances in Battery Manufacturing, Service, and Management Systems** Jingshan Li, Shiyu Zhou, Yehui

Han, 2016-10-24 Addresses the methodology and theoretical foundation of battery manufacturing service and management systems BM2S2 and discusses the issues and challenges in these areas. This book brings together experts in the field to highlight the cutting edge research advances in BM2S2 and to promote an innovative integrated research framework responding to the challenges. There are three major parts included in this book manufacturing service and management. The first part focuses on battery manufacturing systems including modeling analysis design and control as well as economic and risk analyses. The second part focuses on information technology's impact on service systems such as data driven reliability modeling failure prognosis and service decision making methodologies for battery services. The third part addresses battery management systems BMS for control and optimization of battery cells operations and hybrid storage systems to ensure overall performance and safety as well as EV management. The contributors consist of experts from universities industry research centers and government agency. In addition this book provides comprehensive overviews of lithium ion battery and battery electrical vehicle manufacturing as well as economic returns and government support. Introduces integrated models for quality propagation and productivity improvement as well as indicators for bottleneck identification and mitigation in battery manufacturing. Covers models and diagnosis algorithms for battery SOC and SOH estimation data driven prognosis algorithms for predicting the remaining useful life RUL of battery SOC and SOH. Presents mathematical models and novel structure of battery equalizers in battery management systems BMS. Reviews the state of the art of battery supercapacitor and battery supercapacitor hybrid energy storage systems HESSs for advanced electric vehicle applications. Advances in Battery Manufacturing Services and Management Systems is written for researchers and engineers working on battery manufacturing service operations logistics and management. It can also serve as a reference for senior undergraduate and graduate students interested in BM2S2.
