Commentary For someone who knows the extraordinary merits of honey it is difficult to comprehend the reason why this salutary substance has suffered such a setback For sixty centuries throughout his toric ages and undoubtedly even in prehistoric times honey was man's only sweetener and his most favored food delicacy and medicine But Nature's own sweet was displaced by one of man's inferior nay objectionable products Upon the intrusion of re fined sugars honey declined in use and now instead of being an important household necessity it has become an article of luxury Civilization and even science often post only dim lights as warn ing signals before deep chasms on the other hand they neglect to mark with road signs abandoned paths which lead to a better life The culpable disregard of honey is a grave and lamentable error of the present generation and a sad re ection on its intelligence It is almost unbelievable that such an ideal and nourishing food with its delightful bouquet is almost entirely missing from our tables If honey were ever rehabilitated man would wonder how he could ever have gotten along without it About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
