Discussion-Based Online Teaching To Enhance Student Learning Tisha Bender,2023-07-03 The new edition of what is now considered a classic on online learning has been expanded by about a third to reflect new opportunities offered

by social media new insights and ideas derived from the author's teaching in the eight years since she wrote the first edition as well as from extensive research in the latest literature. In particular Tisha Bender investigates whether the existing paradigm of teaching and learning has been changed not so much because of the advent of the Internet but because of the potential divide between the expectations and practices of students who are digital natives of the digital revolution and those of their teachers who are mostly digital immigrants. She addresses the question do we need to change the way we teach in order to reach and engage digital natives fruitfully and enjoyably in their education. This accessible and comprehensive book offers an engaging and practical approach to online teaching that is rooted in the author's experience and enthusiasm for creating a virtual environment that engages students and fosters their deep learning. This is a book for all educators and administrators in higher education in any discipline engaged in or contemplating offering online classes that involve discussion or collaborative learning. It is relevant both to faculty teaching a hybrid and face to face classes and courses conducted entirely online.

Books in Print Supplement, 2002 Transdisciplinary Lifecycle Analysis of Systems R. Curran, N. Wognum, M. Borsato, 2015-07-15. Concurrent Engineering (CE) is based on the premise that different phases of a product's lifecycle should be conducted concurrently and initiated as early as possible within the Product Creation Process (PCP). It has become the substantive basic methodology in many industries including automotive, aerospace, machinery, shipbuilding, consumer goods, process industry and environmental engineering. CE aims to increase the efficiency of the PCP and reduce errors in later phases while incorporating considerations for full lifecycle and through-life operations. This book presents the proceedings of the 22nd ISPE Inc International Society for Productivity Enhancement International Conference on Concurrent Engineering (CE2015) entitled *Transdisciplinary Lifecycle Analysis of Systems* and held in Delft, the Netherlands in July 2015. It is the second in the series *Advances in Transdisciplinary Engineering*. The book includes 63 peer-reviewed papers and 2 keynote speeches arranged in 10 sections: keynote speeches, systems engineering, customization and variability management, production oriented design, maintenance and repair design methods, and knowledge-based engineering, multidisciplinary product management, sustainable product development, service-oriented design, product lifecycle management, and trends in CE. Containing papers ranging from the theoretical and conceptual to the highly pragmatic, this book will be of interest to all engineering professionals and practitioners, researchers, designers, and educators.
