Topic: Shouldn't We Stop Environmental Activism?

Issues like climate change, the loss of biodiversity, and deforestation are wreaking havoc on the world. According to a letter written by 17-year-old Greta Thunberg to youth climate activists, humans are in the middle of the "sixth major extinction of species" on our planet. Some students are taking action by skipping school to protest and strike for climate and the environment. However, in my opinion, students should not be environmental activists.

To begin, students should not be environmental activists because it keeps them from learning environmental information in school. First of all, according to the Al Jazeera article, "Young People Urged..." students from "more than 150 students skipped school" to participate in "another series of worldwide protests." Even though protesting seems like a good way to bring awareness to the issues the world is experiencing with climate, students should not be giving up their time in school. Additionally, University of the People states that "adolescents with highest levels of education tend to be the most 'green' (higher rates of environmental stability, lower crime, and greater equality)" ("Benefits of Education Are Societal and Personal"). This shows that school is essential to a thriving society. Without the time in school to learn important and basic skills, youth protesters are just creating a team of uneducated and unenforced students who will not be able to clearly explain their cause. And, society will suffer, because of the lack of fully educated members.

Also, students should not be environmental activists because at this point, it is too late to reverse the effects of climate change, so activist efforts are pointless. To begin, in the article, "...Top 5 Environmental Concerns..." it states that a "recent United Nations report" said that if we don't make revolutionary changes in human behavior, the "planet will suffer dramatically from global warming in just 12 years." This proves that we really do not have enough time to change the fate of humanity. While most people seem set in their ways of protest, goal the action and protest, it would take a lot longer than a decade to change the minds and behaviors of people on Earth. Additionally, George Marshall, in his book, *Don't Even Think About It*, "draws on a wide range of social science research to explain why we, as a species, would rather not to think about climate change, its implications, or what our response to it should be" ("A Climate of Mind"). This proves that humans are biologically programmed to not be concerned for the future of our climate. People are disconnected about living for now. There is no changing their minds by persuasion or even logic.

On the other side, some people believe that students should be taking action and skipping school to protest and strike. In a letter youth climate activists wrote to Greta Thunberg, they said: "We have the right to live our dreams and hopes... we can only do this with this madness... we, the young people, will

Challenges in Language Testing Around the World Betty Lanteigne, Christine Coombe, James Dean Brown, 2021-02-17 This book combines insights from language assessment, literacy, and critical language testing through critical analyses and research about challenges in language assessment around the world. It investigates problematic practices in language testing which are relevant to language test users such as language program directors, testing centers, and language teachers as well as teachers in training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation. Use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program level language tests, and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real world language use.

songwriter Pete Townshend battled conflicts within the band and their management as well as struggling against the limits of the era's technology as a pioneering synthesizer user and a conceptualist trying to combine rock with film and theatre. The results included some of rock's most ambitious failures and some of its most spectacular triumphs. In *Won't Get Fooled Again* noted rock writer and historian Richie Unterberger documents this intriguing period in detail drawing on many new interviews, obscure rare archive sources and recordings and a vast knowledge of the music of the times. The result is a comprehensive, articulate history that sheds new light on the band's innovations and Pete Townshend's massive ambitions, some of which still seem ahead of their time in the early 21st century.
