Math Problem Solving for Grades 4 Through 8 James L. Overholt, Jane B. Rincon, Constance A. Ryan, 1984 **How to**

**Use Problem-based Learning in the Classroom** Robert Delisle, Association for Supervision and Curriculum Development, 1997 Engaging and motivating students especially the least motivated learners is a daily challenge. But with the process of problem based learning (PBL) any teacher can create an exciting active classroom where students themselves eagerly build problem solving skills while learning the content necessary to apply them. With problem based learning students work begins with an ill defined problem. Key to this problem is how it explicitly links something important in students' daily lives to the classroom. This motivational feature is vital as students define the what, where, and how of resolving the problem situation. Problem based learning may sound potentially chaotic and haphazard but it rests on the firm foundation of a teacher's work behind the scenes. The teacher develops a problem long before students see it, specifically choosing the skills and content the problem will emphasize and matching those to curriculum and standards. Though a PBL problem will have no right answer, the teacher structures the experience so that specific learning takes place as students generate the problem solving steps, research issues, and produce a final product. The teacher guides without leading, assists without directing. *I Do We Do You Do Math Problem Solving Grades 1-5 Perfect* Sherri Dobbs Santos, 2011-07-18 **I DO WE DO YOU DO** An RTI Intervention for Math Problem Solving Grades 1-5 is a ready made intervention based on best practices and current research for students struggling with the underlying thought processes and step by step procedures of math problem solving. Each section includes a Universal Screening, data point assessments, and intervention cards which can be copied and used with individual students or small groups of students. The I DO WE DO YOU DO intervention takes the guess work out of how to intervene with students at risk of failure and provides teachers with the tools necessary to meet their individual needs. A total of 36 problem solving cards are included for each grade 1-5 and follow three simple steps: 1. Teacher models, 2. Teacher student work collaboratively, and 3. Student completes independently. Detailed directions, progress monitoring graphs, and a scoring rubric are included, making the analysis of data easy to record and understand.
