The science of **bubbles**

Bubbles are made of air being stuck between thin layers of liquid.

A bubble has TWO states of matter in it.

1. **liquid**
2. **gas**

Can you draw a line to where each state of matter is?

Fast Fact!

Bubbles float because warm air is lighter than cold air. If the air you blow into the bubble is warmer than the air outside, the bubble will float up!

Pretty Colors!

The colors that you see in bubbles actually come from rays of light reflecting off of the liquid walls of the bubble!
