

## **Project Lead the Way (PLTW)**

The PLTW middle and high school STEM education programs provide the inspiration for a new generation of innovators, the practical skills and hands-on experience to make students' knowledge count in the real world, and the basis for the next generation of leadership in the sciences, technology, engineering, and mathematics.

PLTW develops motivated, well-rounded students by instilling confidence, stressing the importance of self-discovery, encouraging innovative problem solving and critical thinking, teaching team building, and rewarding creativity.

Your student will develop skills essential for achievement in the classroom and success in college and at work. Additionally:

- PLTW students achieve significantly higher scores in reading, mathematics, and science.
- PLTW graduates earn higher GPA's as college freshmen.
- PLTW graduates are 5 to 10 times more likely to study STEM related fields.

Project Lead the Way is a non-profit organization focused on introducing and preparing high school students for Biomedical, engineering and technical careers of the future. PLTW forms partnerships with public schools, higher education institutions and the private sector to increase opportunities for students in engineering and technical fields. Particularly, PLTW provides a high rigor, project-based curriculum meeting national science and math standards, professional development for teachers and guidance counselors and a comprehensive national support network. PLTW courses are accessible to ALL students, and the initial biomedical courses expose students to multiple career options in the biomedical arena. All of the courses are based on problem-solving, teamwork, communication and leadership as the students also build the math, science and technology skills to prepare for and succeed in tomorrow's careers.

Students are eligible for college credit for all four PLTW Biomedical Sciences courses and IED, POE, and DE in the PLTW Engineering program. (For Biomedical Sciences courses, please see Science Curriculum portion of this handbook).

*The Zero Waste Solution* Paul Connett, 2013-10-09 Waste is something we all make every day but often pay little attention to. That's changing and model programs around the globe show the many different ways a community can strive for and achieve zero waste status. Scientist turned activist Paul Connett a leading international figure in decades long battles to fight pollution has championed efforts to curtail overconsumption and keep industrial toxins out of our air and drinking water and bodies. But he's best known around the world for leading efforts to help communities deal with their waste in sustainable ways in other words to eliminate and reuse waste rather than burn it or stow it away in landfills. In *The Zero Waste Solution* Connett profiles the most successful zero waste initiatives around the world showing activists planners and entrepreneurs how to reenvision their community's waste handling process by consuming less turning organic waste into compost recycling reusing other waste demanding nonwasteful product design and creating jobs and bringing community members together in the process. The book also exposes the greenwashing behind renewed efforts to promote waste incinerators as safe nontoxic energy suppliers and gives detailed information on how communities can battle incineration projects that even at their best emit dangerous particles into the atmosphere many of which remain unregulated or poorly regulated. An important toolkit for anyone interested in creating sustainable communities generating secure local jobs and keeping toxic alternatives at bay.

The Green Solution to Breast Cancer Kristen Abatsis McHenry Ph.D., 2015-09-22 This unique research based investigation of the U.S. breast cancer movement compares the pink and green efforts within the movement and documents their use of similar citizen science alliances despite the contention over the use of consumer based activism and pink products. Breast cancer activism is one of the most flourishing research and health advocacy movements in U.S. history. Yet the incidence of breast cancer is continuing to increase. This critical and revealing text investigates breast cancer activism in its two forms the pink movement that focuses

on developing awareness of coping with and managing breast cancer and the green movement that strives to determine the possible environmental causes of breast cancer such as pesticides chemicals and water and air pollution and thereby hopes to prevent breast cancer What caused this new green movement to develop Will it replace or merge with the pink movement Does either approach offer more promise for a solution And how do the two movements differ in their positions or methodology towards a similar goal With information culled from interviews with more than 50 industry stakeholders The Green Solution to Breast Cancer A Promise for Prevention argues that key attributes such as strategy mission and branding have led to a greater convergence between the pink and green wings of the movement and presents information that enables readers to consider if either approach might be the shorter route to beating breast cancer *Information Technology Applications in Industry II* Prasad Yarlagadda,Su Fen Yang,Keon Myung Lee,2013-09-03 Selected peer reviewed papers from the 2013 2nd International Conference on Information Technology and Management Innovation ICITMI 2013 July 23 24 2013 Zhuhai China *The Monitor* ,2008-06 **Haring Charter Township v.
