2014 Exemplar Economics Question Paper:

Capitalism and Economic Crime in Africa Jörg Wiegert, 2024-06-21 This book offers a comprehensive analysis of economic crimes and market irregularities including matters of trickery parallel economy illicit trade economies of violence and criminalisation of the poor in neoliberal Africa. It investigates economic crime as a phenomenon of neoliberal reform and transformation and it unpacks crime as a societal and particularly as a political economic phenomenon under capitalism. The book brings together a collection of research articles, briefings and updated blog posts that were published over a period of nearly 40 years (1986-2023) in the acclaimed journal *Review of African Political Economy* (RAPE) and on its website raope.net. Featuring contributions from leading experts in the field including a foreword by Yusuf K. Serunkuma and an afterword by Laureen Snider, this volume explores what these crimes have to do with and can tell us about state-business relations, regulation, capitalist transformation and the corporation on the continent, shedding light on the co-production of the crimes by a range of actors from the realms of business, politics, state and international development, including major reform advocates such as international financial institutions (IFIs) and other donors. It responds to the imperative to advance the analysis of the link between capitalism and crime in Africa and to locate capitalism more centrally in the analysis of economic crimes as more African countries move from being societies with capitalism to capitalist societies. Illustrating the relevance of African countries to debates in criminology, corporate crime, state crime, crimes of the powerful and illegality, this volume engages with and mobilises a variety of literatures to analyse economic crimes as phenomena of global and local capitalism and provides readers from academia, government, business, media, civil society and education a striking source of information and analysis.

The Macroeconomics of Fiscal Policy Richard W. Kopcke, Geoffrey Bemis, Matthew Tootell, Robert K. Triest, 2006. Leading academics and former policy makers assess the effectiveness of postwar American fiscal policy as questions about the role of fiscal policy once again come to the forefront of economic research and debate. The United States' post World War II emphasis on activist fiscal policy for short term economic stabilization was called into question in the 1960s and by the late 1980s was superseded by the view that fiscal policy should focus on long run structural concerns. For the past two decades both public policy and economic research emphasized monetary policy as a stabilization tool. But there remain issues in American macroeconomic policy having to do with budget deficits present and projected as well as a recent revival of interest in fiscal policy as a stabilization tool. Overall the academic pendulum is swinging back towards a renewed consideration of fiscal policy. This volume brings together leading researchers and policy makers to assess the effectiveness and consequences of fiscal policy. Drawing on postwar policy experience and recent economic research this book offers a state of the art consideration of where fiscal policy stands today. Contributors address both the appropriateness of fiscal policy as a tool for short run macroeconomic stabilization and the longer term impact of fiscal decisions and economic policy. Topics covered include the legacy of the Reagan administration's tax cuts, whether public policy has encouraged such behavior as overconsumption which may foster persistent budget and trade deficits and in light of recent experience how and when fiscal policy might be appropriate as a short term stabilization tool. Contributors: Alan J. Auerbach, Susanto Basu, Olivier J. Blanchard, Alan S. Blinder, Barry P. Bosworth, W. Elliott Brownlee, William H. Buiter, Jonathan Coppel, Jean Philippe Cotis, Luiz de Mello, James S. Duesenberry, Douglas W. Elmendorf, Eric Engen, Jeffrey A. Frankel, Benjamin M. Friedman, Richard W. Kopcke, Catherine L. Mann, Van Doorn, Ooms, Rudolph G. Penner, Alice M. Rivlin, Christopher A. Sims, C. Eugene Steuerle, Geoffrey M. B. Tootell, Robert K. Triest, Edwin M. Truman.

Just Security in an Undergoverned World William Dürch, Joris Larik, Richard Ponzio, 2018-01-19. Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis. Global connectivity is increasing visibly and invisibly in trade, finance, culture and information, helping to spur economic growth, technological advance and greater understanding and freedom. But global disconnects are growing as well. Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war. People abandon burning states for the often indifferent welcome of

wealthier lands whose people in turn draw into themselves Humanity's very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity's future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic diseases that transcend borders and the capacities of individual actors It offers just security as a new framework for charting innovating solutions and strategies for effective and essential global governance
