others when documenting. This is based on the strict hierarchy of the coding procedures. HCCs are captured once a year every year in order for the CMS to reimburse payments to the Medicare Advantage. However, diagnoses from previous years are used to establish capitation payments to the Medicare Advantage plan. *Medicare Risk Adjustment and Hierarchical Condition Category (HCC)* V. G, 2018-08-21 Risk Adjustment and Hierarchical Condition Category. HCC coding is a payment model mandated by the Centers for Medicare and Medicaid Services CMS in 1997. Implemented in 2003, this model identifies individuals with serious or chronic illness and assigns a risk factor score to the person based upon a combination of the individual's health conditions and demographic details. The individual's health conditions are identified via International Classification of Diseases 10 (ICD 10) diagnoses that are submitted by providers on incoming claims. There are more than 9000 ICD 10 codes that map to 79 HCC codes in the Risk Adjustment model. CMS requires documentation in the person's medical record by a qualified health care provider to support the submitted diagnosis. Documentation must support the presence of the condition and indicate the provider's assessment and/or plan for management of the condition. This must occur at least once each calendar year in order for CMS to recognize the individual continues to have the condition. The Centers for Medicare and Medicaid Services CMS Risk Adjustment Model includes nearly 80 HCC categories of chronic illnesses with thousands of diagnosis codes. Beginning HCC coders need solid instruction on HCC coding to properly map codes and ensure the organization receives the reimbursement payments. This webinar educates the audience on HCC coding and discusses popular risk adjustment coding guidelines. It identifies what makes a document valid for submission including which sources of documentation should or should not be used. Attendees will have the opportunity to review common mistakes like a lack of specificity in provider documentation. Often overlooked conditions which are frequently undocumented by the provider are also explained. The presenter will give a brief demonstration on how to determine if a condition is reimbursed or not as well as a case study showing how to apply the theories learned. Through clarification of codes and specific examples, the speaker underscores the importance of provider documentation and its impact on reimbursement. This session is a great overall introduction for beginners and the perfect refresher course for those who have already begun and want to enhance their knowledge in the field. Objectives: Learn about HCC coding and risk adjustment coding guidelines. Demonstrate how mapping tools help to properly identify HCCs. Understand the importance of provider documentation and its impact on reimbursement. Risk adjustment in the CMS HCC model characteristics is based on multiple factors which are analyzed and reduced to offer the right risk management plan for a patient. The factors that influence risk adjustment includes: Hierarchy of diseases. Ensuring that diagnoses are included in the appropriate disease groups and are in accordance with the necessary hierarchy. Disease Interactions. The additional factors that recognize and assess the severity of multiple conditions. Demographic Variables. These focus on the demographic of the patient's living conditions and demographics. Diagnostic Sources. CMS recognizes diagnoses from a hospital's inpatient, outpatient, and physician settings only. Prospective model. The diagnoses

based on last year are used to extrapolate the possible payments for the next year. Multiple conditions A patient can have multiple HCC categories assigned to them based on their medical conditions. In some cases specific conditions can override others when documenting. This is based on the strict hierarchy of the coding procedures. HCCs are captured once a year every year in order for the CMS to reimburse payments to the Medicare Advantage. However, diagnoses from previous years are used to establish capitation payments to the Medicare Advantage plan.

Category Conditions (HCC) David Shogan, 2017-06-24 Risk Adjustment and Hierarchical Condition Category. HCC coding is a payment model mandated by the Centers for Medicare and Medicaid Services CMS in 1997. Implemented in 2003 this model identifies individuals with serious or chronic illness and assigns a risk factor score to the person based upon a combination of the individual's health conditions and demographic details. The individual's health conditions are identified via International Classification of Diseases 10 ICD 10 diagnoses that are submitted by providers on incoming claims. Documentation must support the presence of the condition and indicate the provider's assessment and or plan for management of the condition. This must occur at least once each calendar year in order for CMS to recognize the individual continues to have the condition. Accurate HCC coding information helps create a more complete picture of the complexity of a patient population improves the value of the problem list and enables better management of a patient's chronic diseases. And better documentation that captures the full complexity of the patient often results in appropriately higher reimbursement. Current challenges and opportunities. Provider organizations are facing several challenges as they plan for HCC coding and documentation. 1. Provider engagement education and incentive alignment. Impacts to workflow and efficiency. 2. Insufficient or incomplete medical record documentation in the EHR. 3. EHR disconnect and poor problem list utilization. 4. Incorrect coding. 5. Inferior or non-existent HCC specific analysis and prioritization. The Medicare Annual Wellness Visit AWV is a yearly preventative care visit offered at no cost to all Medicare Part B beneficiaries. The purpose of the visit is to identify patient risk factors and plan for future preventative service needs. This visit is well reimbursed and can be conducted by any licensed health professional or a team of professionals under the direct supervision of a physician. While the AWV is recognized as an important benefit 82.3% of Medicare beneficiaries did not receive an AWV in 2015. The bottom line is that patients want time with their physicians to discuss their health. Our clients have professed repeatedly that they see a difference in patient engagement as they capture more AWVs. With changes like value based purchasing putting revenue at risk accurate documentation is even more critical. A good physician query process helps but relying on queries alone leaves money on the table. You need to prevent documentation errors from happening in the first place by getting your physicians to pay closer attention to what they write.

down The medical record should tell a story Coding specialist need to understand what the physician is thinking and know when the provider isn't documenting the complete information to assign the most specific diagnosis code Ensure that all opportunities for documentation improvement are identified For the medical record to be accurate and timely a physician query process should be in place Ongoing chart reviews and provider education reinforces the essential points of good documentation and helps to bridge the gap between what the provider needs clinically documented in the medical record from one visit to the next and the coding guidelines that are required to support the codes being submitted *ICD-10-CM Code Book, 2014 Draft* Anne B. Official Codebook provides the entire updated code set for diagnostic coding organized to make the challenge of accurate coding easier. This codebook is the cornerstone for establishing medical necessity, determining coverage and ensuring appropriate reimbursement. Each of the 21 chapters in the Tabular List of Diseases and Injuries is organized to provide quick and simple navigation to facilitate accurate coding. The book also contains supplementary appendixes including a coding tutorial, pharmacology listings, a list of valid three character codes and additional information on Z codes for long term drug use and Z codes that can only be used as a principal diagnosis. Official coding guidelines for 2021 are bound into this codebook.

FEATURES AND BENEFITS

- Full list of code changes: Quickly see the complete list of new, revised and deleted codes affecting the FY 2021 codes including a conversion table and code changes by specialty.
- QPP symbol in the tabular section: The symbol identifies diagnosis codes associated with Quality Payment Program (QPP) measures under MACRA.
- New and updated coding tips: Obtain insight into coding for physician and outpatient settings.
- New and updated definitions: In the tabular listing, assign codes with confidence based on illustrations and definitions designed to highlight key components of the disease process or injury and provide better understanding of complex diagnostic terms.
- Intuitive features and format: This edition includes full color illustrations and visual alerts including color coding and symbols that identify coding notes and instructions.
- Additional character requirements: Codes associated with CMS hierarchical condition categories (HCC).
- Medicare Code Edits (MCEs): Manifestation codes, other specified codes and unspecified codes.
- Placeholder X: This icon alerts the coder to an important ICD 10 CM convention: the use of a placeholder X for three, four and five character codes requiring a seventh character extension.
- Coding guideline explanations and examples: Detailed explanations and examples related to application of the ICD 10 CM chapter guidelines are provided at the beginning of each chapter in the tabular section.
- Muscle tendon translation table: This table is used to determine muscle tendon action (flexor, extensor, other) which is a component of codes for acquired conditions and injuries affecting the muscles and tendons.
- Index to Diseases and Injuries: Shaded guides to show indent levels for subentries.
- Appendices: Supplement your coding knowledge with information on proper coding practices, risk adjustment coding, pharmacology and Z codes.
