*The Economy of Ghana Sixty Years After Independence* Ernest Aryeetey, S. M. Ravi Kanbur, 2017 This volume assesses the challenges facing Ghana's economy as it enters its seventh decade and the nation heads towards three quarters of a century of independence

Toxicological Risk Assessment for Beginners José A. Torres, Sol Bobst, 2015-03-27 This book serves as a comprehensive introductory guide to the practical aspects of risk assessment. Chapters include clearly defined objectives and summaries. The book includes hazard identification, dose response, exposure assessment, risk characterization, chemical mixtures, epidemiology, emerging issues, and global perspectives with accessible language. The book concludes with a set of hypothetical case studies. *Toxicological Risk Assessment for Beginners* aims not to create an expert but rather to provide readers with their first understanding of the risk assessment topic. This book was designed with the student in mind. We simplify a complex process for beginners and balance theory with practical aspects but remain fluid enough to increase difficulty with case studies. By incorporating an action-based step-by-step approach to learning the risk assessment process, this book provides its readers with an elementary understanding of how the risk assessment process is initiated, developed, and finished, making it a valuable guide for graduate students, post-doctoral fellows, and early career scientists in industry.

*Land Use Cover Datasets and Validation Tools* David García-Álvarez, María Teresa Camacho Olmedo, Martin Paegelow, Jean François Mas, 2022-06-16 This open access book represents a comprehensive review of available land use cover data and techniques to validate and analyze this type of spatial information. The book provides the basic theory needed to understand the progress of LUCC mapping, modeling, validation, practice. It makes accessible to any interested user most of the research community's methods and techniques to validate LUC maps and models. Besides, this book is enriched with practical exercises to be applied with QGIS. The book includes a description of relevant global and supra-national LUC datasets currently available. Finally, the book provides the user with all the information required to manage and download these datasets.

*A Case for Radical Pragmatic Leaders and Personalised Learning Schools* Andrew Bills, 2020-06-23 Thousands of young people from disadvantaged backgrounds are forsaking education in secondary mainstream schools across Australia. This book places a sociological and lived experience phenomenological lens on public policy that is working against school inclusion, learning engagement, and post-school opportunity. The school case studies provided here highlight the damage done and the opportunity for refreshed policy approaches to address this malaise. Across the educational landscape, there are a number of fine examples of schools that are choosing to do schooling against the grain of unhelpful regulatory policy that works to exclude many from their educational entitlement. These schools and their practices are examined in this book and are presented as examples for policy learning. If education systems learn to embrace an ongoing culture of research and inquiry where the evidence-based and contextual learning experiences of students, teachers, and Principals are equally valued and heard in the policy realm, the phenomenon of early school leaving can begin to turn around.

This work calls upon Principals in the first instance to become more radical and pragmatic in their leadership of schools collectively working with courage to ensure that the experience of schooling is personalised to the learning needs and career aspirations of all young people
