## 2014 Leap Scaled Score Ranges:

**From Evidence to Action** Food and Agriculture Organization of the United Nations, 2018-10-18 Cash transfers have become a key social protection tool in developing countries and have expanded dramatically in the last two decades. However, the impacts of cash transfers programmes especially in Sub Saharan Africa have not been substantially documented. This book presents a detailed overview of the impact evaluations of these programmes carried out by the Transfer Project and FAO's From Protection to Production project. The 14 chapters include a review of eight country case studies Kenya, Ghana, Ethiopia, Zambia, Zimbabwe, Lesotho, Malawi, South Africa as well as a description of the innovative research methodologies, political economy issues and good practices to design cash transfer programmes. The key objective of the book is to enhance the understanding of these development programmes how they lead to a broad range of social and productive impacts and also of the role of programme evaluation in the process of developing policies and implementing programmes.

The Next Phase in Heritage Language Studies: Methodological Considerations and Advancements Fatih Bayram, Maki Kubota, Sergio Miguel Pereira Soares, 2024-03-27 Over the past three decades studies investigating heritage speaker (HS) linguistic competencies have shown time and again that despite being L1 or 2L1 native speakers of their home language(s) HS outcomes display variation across a wide spectrum of differences as compared to each other other types of bilinguals as well as their monolingual peers. Studies have traditionally used mostly behavioral methodologies rooted in adjacent established fields e.g. L1 acquisition, adult L2 acquisition, offering in addition to documenting and describing HS performance important insights for linguistic theory and challenges related to home minority language maintenance, contact policy and more. A birds eye view makes it clear that the methodologies one uses to tap into HSs linguistic knowledge areas if not more are important than the phenomena under investigation especially in light of how their unique experiences with their heritage and other languages are present across a continuum.
