takes readers on a riveting journey around the world to some of the worst lab mishaps in history including the largely unknown stories of the lab workers at the U S Army's Camp Detrick who suffered devastating infections at alarming rates during World War II And her groundbreaking reporting exposes for the first time disturbing new details about recent accidents at prestigious laboratories and the alarming gaps in government oversight that put all of us at risk Sourced through meticulous reporting and exclusive interviews with key players including Dr Anthony Fauci former CDC Director Tom Frieden and others Young's examination reveals that the only thing rare about lab accidents is the public rarely finds out about them Because when accidents happen powerful people and institutions often work hard to keep the information secret
