

FINAL REVIEW - Answers should be exact, for inequalities use interval notation to describe the solution.

Solve

1. Given the function  $f(x) = \frac{5-7x}{3x+9}$ , state the domain in interval notation.

2. Find the domain of the rational function.

$$f(x) = \frac{3x+2}{(5x-3)(x+2)}$$

3. Rewrite the quadratic equation in standard form by completing the square.

$$y = x^2 - 2x + 7$$

$$y = -x^2 - 12x + 3$$

$$y = x^2 - 5x$$

4. Find the vertex of the parabola associated with the quadratic function and identify the direction it opens.

$$y = (x - 8)^2 + 34$$

$$y = -(x - 3)^2 + 12$$

$$y = -15(x + 15)^2 + 11$$

5. Solve by factoring.  $6x^2 - 21x + 12 = 0$

6. Solve using the square root method.  $(3x - 2)^2 = 36$

7. What number should be added to complete the square of the expression?

$$x^2 - \frac{3}{7}x$$

**Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles** Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design

methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation
