There are at least five \_\_\_\_\_ species on Earth, and some scientists believe there could be double that number. A \_\_\_\_\_ is a group of animals that are more like each other than they are like any other group of animals. They can \_\_\_\_\_ with each other but not with members of other species. A way of sorting through all those species is to organize them by similar properties, or \_\_\_\_\_. This process is called \_\_\_\_\_.

The following is a list of \_\_\_\_\_ for each group of animals.

\_\_\_\_\_ give birth to their young and feed them with milk, have \_\_\_\_\_ on at least part of their body, breathe with lungs and are \_\_\_\_\_.

\_\_\_\_\_ lay eggs with a hard shell, are covered with feathers, have a beak, have wings used for flying (ostriches and penguins are flightless), have \_\_\_\_\_ bones and are warm-blooded.

\_\_\_\_\_ lay eggs with \_\_\_\_\_ shells or give birth to fully-formed young, breathe with lungs, are covered with \_\_\_\_\_, have no legs or four legs with clawed toes are \_\_\_\_\_.

\_\_\_\_\_ have three body parts, head, thorax and abdomen, have a single pair of antennae on the head, have three pairs of legs originating from the thorax, often have wings and can fly.

\_\_\_\_\_ lay eggs without shells in water, breathe with \_\_\_\_\_, are covered with scales or smooth, leathery skin, have \_\_\_\_\_ but no legs or toes are cold-blooded.

\_\_\_\_\_ lay eggs, usually in a \_\_\_\_\_ mass in water, breathe with lungs, gills, and/or their skin, have smooth skin without coverings, have four legs without claws or nails on toes are cold-blooded.

### **US educational achievement on international assessments**

Ben Dalton, 2011-05-23 The debate about the performance of US students on international assessments of educational achievement routinely fails to account for one consistently stark result US achievement is bifurcated between a group of high performing Asian and white students and an exceptionally low performing group of black and Hispanic students By summarizing results across 20 major international tests conducted since 1995 this research paper shows that when US racial and ethnic groups are separately compared with other countries Asian and white students regularly perform at or near the top of international rankings while black and Hispanic students typically rank at or near the bottom Furthermore the United States has a substantially larger minority population than all other developed countries and minority status is not synonymous with internationally comparable factors such as socioeconomic level or immigrant status The fact that overall US scores are disproportionately influenced by race and ethnicity suggests that researchers and reformers must reconsider how they use and interpret the results of international achievement tests The research paper recommends providing and analyzing cross national data separately by ethnic groups to inform approaches to improving education for all students
