- "Matter, Physical and Chemical Changes" lesson plan from 4th grade curriculum guide

Benchmarks:

PS-1, PS-3 & PS-4 (Benchmark A & B): Identify characteristics of a simple physical change. Describe objects by the properties of the materials from which they are made and that these properties can be used to separate or sort a group of objects. Explain that matter has different states and that each state has distinct physical properties. SI-3, 4, 5, 6 (Benchmark C): Develop, design, and safely conduct scientific investigations and communicate the results.

Objectives:

In this lesson, the students will learn that a physical change is a change in size, shape, or state of matter of a substance. Some physical changes are more difficult to determine than others because two substances can dissolve in each other. However, if one of those substances is removed, the other will return in its original state, to show that only a physical change took place, because no new substance was formed.

Materials:

- Spaghetti
- Water
- Pan
- Hot plate
- Unopened soda bottle
- Large plastic bowl

Materials needed for each group of three:
