

4TH GRADE SCIENCE

Animal & Plant Life Cycles

The image displays a collection of educational resources for 4th-grade science, specifically focusing on animal and plant life cycles. In the foreground, a laptop screen shows a grid of eight diagrams illustrating various life cycles, including those of plants, insects, and animals. To the right, a worksheet titled "Butterfly Scavenger Hunt" is visible, featuring images of monarch butterflies and painted ladies, along with checkboxes for identification. Another worksheet, titled "Animal and Plant Life Cycles," provides a detailed explanation of life cycles, distinguishing between simple cycles (like those of mammals, birds, reptiles, and most fish) and complex cycles (metamorphosis, like that of butterflies). It includes diagrams of a bird's life cycle and a fish's life cycle, as well as a section on metamorphosis with a diagram of a frog's life cycle. The background features a large illustration of a monarch butterfly on a branch with green leaves and a caterpillar.

Animal and Plant Life Cycles

Butterfly Scavenger Hunt

Some animals go through a simple life cycle and some go through a more complex cycle called metamorphosis.

Simple Life Cycle

Mammals, birds, reptiles and most fish have simple life cycles. They lay eggs or are born, then they grow and become an adult, like the fish or the bird. You will notice that in the case of both the bird and the fish, the young are similar to the adult. There are not major changes in the shape of their bodies.

Metamorphosis

Amphibians, which include frogs, toads, salamanders and newts, all go through metamorphosis. Here is the life cycle of a frog. Notice that after it hatches and swims in the water, after several changes it transforms to a legged animal that can survive on land for periods of time. This is a metamorphosis. Butterflies also go through metamorphosis. They start as an egg, then become a caterpillar, then a pupa, and finally a butterfly.
