Chromosome Research and What Remains to be Learned A. Lima-de-Faria, 2003-07-31 One Hundred Years of Chromosome Research What Remains to be Learned offers the reader a critical analysis of the observations and experiments that shaped the last 100 years of chromosome research as well as the ideas which prevailed during this period Emphasis is placed on what remains to be learned particularly in light of reality of the sequencing of DNA which leaves the previous era of chromosome research as a prehistoric event It is at this turning point that well formulated questions can be asked about many of the chromosome s properties which remain to be unveiled The author Lima de Faria is Professor Emeritus of Molecular Cytogenetics at Lund University Sweden previously Head of the Institute of Molecular Cytogenetics Lund University

Cell Signalling John T. Hancock, 2017 Signaling within and between cells is one of the most important aspects of modern biochemistry and cell biology An understanding of signalling pathways is vital to a wide range of biologists from those who are investigating the causes of cancer to those who are concerned about the impact of environmental pollutants on the ecosystem The way cells adapt to changing environments and the way cell dysfunction causes disease is underpinned by cell signalling events Cell Signalling presents a carefully structured and highly accessible introduction to this intricate and rapidly growing field Starting with an overview of cell signalling and highlighting its importance in many biological systems the book goes on to explore the key components of extracellular and intracellular signalling mechanisms before examining how these components come together to create signalling pathways A focus on common components and concepts rather than mechanistic detail allows the reader to gain a thorough understanding of the principles that underpin cell signalling Online Resource Centre The Online Resource Centre to accompany Cell Signalling features For students Links to useful websites For registered adopters of the text Journal Clubs suggested research papers and discussion questions linked to topics featured in the book Figures from the book in electronic format for use in lectures
