## Amc 8 Study:

**Conquering the AMC 8** Jai Sharma, Rithwik Nukala, The American Mathematics Competition AMC series is a group of contests that judge students' mathematical abilities in the form of a timed test. The AMC 8 is the introductory level competition in this series and is taken by tens of thousands of students every year in grades 8 and below. Students are given 40 minutes to complete the 25 question test. Every right answer receives 1 point and there is no penalty for wrong or missing answers so the maximum possible score is 25. While all AMC 8 problems can be solved without any knowledge of trigonometry, calculus, or more advanced high school mathematics, they can be tantalizingly difficult to attempt without much prior experience and can take many years to master because problems often have complex wording and test the knowledge of mathematical concepts that are not covered in the school curriculum. This book is meant to teach the skills necessary to solve most any problem on the AMC 8. However, our goal is to not only teach you how to perfect the AMC 8 but we also want you to learn and understand the topics presented as if you were in a classroom setting. Above all, the first and foremost goal is for you to have a good time learning math. The units that will be covered in this book are the following: Test Taking Strategies for the AMC 8, Number Sense in the AMC 8, Number Theory in the AMC 8, Algebra in the AMC 8, Counting and Probability in the AMC 8, Geometry in the AMC 8, Advanced Competition Tricks for the AMC 8. **AMC 8 Champions**
