of the Food System,2015-06-17 How we produce and consume food has a bigger impact on Americans well being than any  
other human activity The food industry is the largest sector of our economy food touches everything from our health to the  
environment climate change economic inequality and the federal budget From the earliest developments of agriculture a  
major goal has been to attain sufficient foods that provide the energy and the nutrients needed for a healthy active life Over  
time food production processing marketing and consumption have evolved and become highly complex The challenges of  
improving the food system in the 21st century will require systemic approaches that take full account of social economic  
ecological and evolutionary factors Policy or business interventions involving a segment of the food system often have  
consequences beyond the original issue the intervention was meant to address A Framework for Assessing Effects of the  
Food System develops an analytical framework for assessing effects associated with the ways in which food is grown  
processed distributed marketed retailed and consumed in the United States The framework will allow users to recognize  
effects across the full food system consider all domains and dimensions of effects account for systems dynamics and  
complexities and choose appropriate methods for analysis This report provides example applications of the framework based  
on complex questions that are currently under debate consumption of a healthy and safe diet food security animal welfare  
and preserving the environment and its resources A Framework for Assessing Effects of the Food System describes the U S  
food system and provides a brief history of its evolution into the current system This report identifies some of the real and  
potential implications of the current system in terms of its health environmental and socioeconomic effects along with a  
sense for the complexities of the system potential metrics and some of the data needs that are required to assess the effects  
The overview of the food system and the framework described in this report will be an essential resource for decision makers  
researchers and others to examine the possible impacts of alternative policies or agricultural or food processing practices
