Official Guide to Writing Programs David W. Fenza,1999 Racing Translingualism in Composition Tom Do,Karen Rowan,2022-09-15 Racing Translingualism provides both theoretical and pedagogical reconsiderations of the translingual approach to language diversity by addressing the intersections of race and translingualism This collection extends the

disciplinary conversations about translanguaging by foregrounding the role race and racism play in the construction and maintenance of language differences. In doing so the contributors examine the co-naturalization of race and language in order to theorize a race conscious translanguaging praxis. The book begins by offering generative critiques of translanguaging centering on the ways in which the approach's democratic orientation to language avoids issues of race, language and power and appeals to colorblind racist tropes of equal opportunity. Following these critiques contributors demonstrate the important intersections of race and translanguaging by drawing upon voices typically marginalized by monolingual language ideologies and pedagogies. Finally, *Racing Translingualism* concludes by attending to the pedagogical implications of a race conscious translanguaging praxis in writing and literacy education. Making the case for race conscious rather than colorblind theories and pedagogies, *Racing Translingualism* offers a unique take on how translanguaging is theorized and practiced and moves the field forward through its direct consideration of the links between language, race and racism.

The Writers Directory, 2013, [The Design of Learning Experience](#), Brad Hokanson, Gregory Clinton, Monica W. Tracey, 2015-07-03. This book delves into two divergent yet parallel themes: first is an examination of how educators can design the experiences of learning with a focus on the learner and the end results of education; and second, how educators learn to design educational products, processes and experiences. The book seeks to understand how to design how learning occurs both in the instructional design studio and as learning occurs throughout the world. This will change the area's semantics at a deeper level; it will change its orientation from instructors and information to learners and it will change how educators take advantage of new and old technologies. This book is the result of a research symposium.

ElizabethAnne Stewart,2025-07-29 Coaching often leads to a mind shift a change in perspective It s not about maintaining the status quo but about diving deeper gaining clarity understanding oneself becoming more authentic and encountering truth This mind shift is an epiphany moment a moment of discovery good or bad that shatters old ways of thinking and sets the future in motion Though typically associated with religious experience or literature epiphanies are foundational to coaching ensuring that the coach and client enter a shared transformational process **Unlocking Epiphany Moments A Primer for Life Coaches and Other Inner Guides** represents an unexplored field relevant to anyone who provides inner guidance Dr Stewart claims that epiphanies offer a framework for generating meaning providing a GPS for the maze of life and allowing clients to deepen their exploration into their motivations and options and the forces that block them This book defines various epiphanies while exploring the skills and strategies that coaches can cultivate to facilitate such powerful moments
