*The Living Classroom* David Armington, 1997 This book describes the special way one teacher Jeanette Amidon approaches children s thinking with a particular focus on reading and writing instruction The root value of her first grade classroom in Massachusetts is respect for children s ideas with the children s art and writing as visible signs of the teacher s respect for their thinking This teacher s example can be used to support the case for a broad cultural view of teaching in which teaching children is not only or mainly the challenge of imparting specific skills but rather a whole approach to living together as a small provisional classroom

community dedicated to the development of ideas Important points in Jeanette Amidon's approach include that children learn well from experiences in which they have a vital stake and some genuine interest that high quality learning involves authentic performance writing for example should be a means of saying something an individual wants or needs to say to some audience not a school exercise that a certain amount of curriculum should arise from a continuous reconstruction of experience generated by the ongoing activities of children that capitalizing on individual differences is important and that collective learning is powerful Following an introduction the book's chapters are 1 Jeanette's Classroom An Action Report by a Frequent Visitor 2 Learning to Talk in a New Language Children's Inventions as a Stimulus to Writing 3 A Lot on Their Minds A Closer Look at the Work of the Children 4 The Larger Picture We Talk with Jeanette about Children Learning and Teaching 5 Reflections and Epilogue Contains 32 annotated references EV *McGraw-Hills Conquering the GMAT Math and Integrated Reasoning, 2nd Edition* Robert E.
