

Question 1

The fear of negative evaluation (FNE) scores for 11 female students known to suffer from the eating disorder bulimia and 14 female students with normal eating are reported in the next table. Assume that each sample is a simple random sample from female student population and the two samples are independent from each other.

Bulimic Students	21	13	10	20	25	19	16	21	24	13	14			
Normal students	13	6	16	13	8	19	23	18	11	19	7	10	15	20

- For each sample, produce a histogram, and a box plot using R. Carefully examine each plot with regards to outliers, symmetry, and modes. Also produce a normal probability plot and comment on the general pattern of the plot and the p-value. Provide a short summary of your findings for each sample. Based on your findings give an evaluation of how well each sample agrees with the normality assumption.
- Construct and interpret a 95% two sample t-confidence interval for the difference of the mean scores of the two groups.
- Based on your analysis in part (a), is there any concern regarding the reliability of the confidence interval produced by the two sample t-procedure. Explain your rationale.
- Do you think it is reasonable to assume that the standard deviations of the two populations are equal? Apply Levene's test to see if there is any evidence against the equal standard deviations. Do your findings depend on the normality assumption in any way?
- Construct and interpret a 95% pooled two sample t confidence interval, and compare it to the confidence interval you found in part b. Which confidence interval would you recommend to use? Explain your rationale.

Question 2

(Textbook problem 9.23) To determine the amount of a drug in tablets, twenty five tablets were produced at each of two different independent sites. Drug concentrations (measured as a percentage) for the tablets are given in the file Tablet.csv in the Data sets folder at D2L. We would like to perform a hypothesis test to see if there is a difference in the average drug content of the tablets produced at these two different sites.

- For each sample, produce a histogram, and a box plot using R. Carefully examine each plot with regards to outliers, symmetry, and modes. Also produce a normal probability plot and comment on the general pattern of the plot and the p-value. Provide a short summary of your findings for each sample. Based on your findings give an evaluation of

Answers To My Stat Lab Statistics:

Stat Labs Deborah Nolan,Terry P. Speed,2006-05-02 Integrating the theory and practice of statistics through a series of case studies each lab introduces a problem provides some scientific background suggests investigations for the data and provides a summary of the theory used in each case Aimed at upper division students **StatLab** Joseph Lawson

Hodges,David Krech,Richard S. Crutchfield,1975 **Statlab Review** Iowa State University. Statistical Laboratory,1947

InfoWorld ,1996-08-12 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **Promoting Statistical Practice and Collaboration in Developing Countries** O. Olawale Awe,Kim Love,Eric A. Vance,2022-06-07 Rarely but just often enough to rebuild hope something happens to confound my pessimism about the recent unprecedented happenings in the world This book is the most recent instance and I think that all its readers will join me in rejoicing at the good it seeks to do It is an example of the kind of international comity and collaboration that we could and should undertake to solve various societal problems This book is a beautiful example of the power of the possible It provides a blueprint for how the LISA 2020 model can be replicated in other fields Civil engineers or accountants or nurses or any other profession could follow this outline to share expertise and build capacity and promote progress in other countries It also contains some tutorials for statistical literacy across several fields The details would change of course but ideas are durable and the generalizations seem pretty straightforward This book shows every other profession where and how to stand in order to move the world I urge every researcher to get a copy David Banks from the Foreword Promoting Statistical Practice and Collaboration in Developing Countries provides new insights into the current issues and opportunities in international statistics education statistical consulting and collaboration particularly in developing countries around the world The book addresses the topics discussed in individual chapters from the perspectives of the historical context the present state and future directions of statistical training and practice so that readers may fully understand the challenges and opportunities in the field of statistics and data science especially in developing countries Features Reference point on statistical practice in developing countries for researchers scholars students and practitioners Comprehensive source of state of the art knowledge on creating statistical collaboration laboratories within the field of data science and statistics Collection of innovative statistical teaching and learning techniques in developing countries Each chapter consists of independent case study contributions on a particular theme that are developed with a common structure and format The common goal across the chapters is to enhance the exchange of diverse educational and action oriented information among our intended audiences which include practitioners researchers students and statistics educators in developing countries Computers in the Instructional Process Karl L. Zinn,Mario Refice,Aldo Romano,1973 **Annual Report - Statistical Laboratory, Iowa State University** Iowa State University. Statistical Laboratory,1990 *Innovations in Teaching Statistics* Joan B. Garfield,2005 This is a book of stories

about teaching statistics These stories are told by fourteen different instructors of innovative statistics courses who demonstrate that learning statistics can be a positive meaningful and even exciting experience Despite the prevailing opinion that statistics courses are dull and difficult for students these stories paint quite a different picture In the classes of the instructors whose stories fill this book students are engaged in learning are empowered to do statistics and appreciate the instructional methods of their teachers The instructors profiled in this book are inspiring dedicated teachers who have devoted considerable effort to creating courses and materials that enable students to successfully learn statistics Each chapter begins by describing how the author became a teacher of statistics then provides details about the courses they currently teach describing their teaching method textbook types of student assessments and uses of technology One typical class is described in detail to provide a snapshot of what each person's teaching looks like The writers then tell the story of the process they went through in developing an innovative course and conclude their chapters with a discussion of their future plans for course revision or development As you read these stories you will learn about some great activities some helpful technological tools and some innovative assessment methods By reading these stories teachers of statistics will understand and be motivated to try different ways to implement reform recommendations so that these recommendations may continue to lead to a variety of new materials activities and teaching approaches I hope that teachers of statistics may be inspired by these stories and feel encouraged to try new methods leave behind more traditional approaches to teaching statistics and carefully examine the effect of their teaching on student learning Publisher **Quantity and Quality in**
