It's important to note that RATES are just rough estimates and serve as the minimum starting point for building your structure. The final COSTS of your building may change based on the design you choose. It's a good idea to speak with an ARCHITECT to fully understand the costs associated with building to meet your unique needs. Several factors can impact the overall cost of a building project, such as soil conditions, market conditions, and labor. This information is intended to be a helpful resource during the early stages of the design process, allowing you to understand any limitations and plan accordingly. Please keep in mind that the cost of LUXURY buildings may exceed the estimates provided here. Additionally, items such as landscaping, pools, fences, and other structures are not included in the approximate building rate and must be calculated separately. Finally, it's worth mentioning that professional fees, transaction and permit fees, taxes, and other similar costs are not included in the approximate building construction rate.
