## Questions

Below is a list of questions to be addressed as a result of this requirements document:

| Question | Outcome |
|---|---|
| What about Google Apps | <ul><li>We think this is important, but not for version one.</li><li>We can look at this at a later stage.</li><li>💡 It might be worth someone looking into a shared notification library to do this.</li></ul> |
| Are we supporting Blackberry? | <ul><li>Again, not for initial version - but we haven't had much demand for this.</li></ul> |
| Should we have an offline mode? | We've talked about the pros and cons. In brief:<br>➕ Seamless experience for customers, they won't notice if there is a connection issue<br>➕ Most of our competitors don't have this<br>➖ Could be expensive to build<br>❓ Should we spike this at a later sprint? |

## Not Doing

- Google Apps Authentication - out of scope, see above for details
- Blackberry support - we won't look at doing this, if demand picks up we can look at it.
- Native app. We are starting with a mobile web view first and get back to a native app depending on feedback that we get.
