Quality Control Applications in the Pharmaceutical and Medical Device Manufacturing Industry Carrillo-Cedillo, Eugenia Gabriela, Arredondo-Soto, Karina Cecilia, Palomino-Vizcaino, Kenia, Magaña-Badilla, Héctor Alfonso, 2022-03-18 Quality control in pharmaceutical products and medical devices is vital for users as failing to comply with national and international regulations can lead to accidents that could easily be avoided. For this reason, manufacturing a quality medical product will support patient safety. Microbiologists working in both the pharmaceutical and medical device industries face considerable challenges in keeping abreast of the myriad microbiological references available to them and the continuously evolving regulatory requirements. Quality Control Applications in the Pharmaceutical and Medical Device Manufacturing Industry presents the importance of quality control in pharmaceutical products and medical devices which must have very high quality standards to not cause problems to the health of patients. It reinforces and updates the knowledge of analytical, instrumental and biological methods to demonstrate the correct quality control and good manufacturing practice for pharmaceutical products and medical devices. Covering topics such as pharmaceutical nano systems, machine learning and software validation, this book is an essential resource for managers, engineers, supervisors, pharmacists, chemists, academicians and researchers.
