Abstract— The evolution of today's mobile devices increases the number of mobile applications developed and among them the quiz applications. Android Mobile hardware and software platforms allow the running of faster and richer applications. This paper presents the main steps in the development of a quiz application for Android using Android Studio. This work deals with the development of an Android-based multiple-choice question examination system, namely: Quiz App. This application is developed for educational purposes, allowing the users to prepare the multiple-choice questions for different examinations conducted on an online platform. The main goal of the application is to enable users to practice for subjective tests conducted for admissions and recruitment, with the focus on Computer Science field.

Keywords—evolution, Quiz App, Application, Android studio, Multiple-choice questions.

I. INTRODUCTION

Development of Android-based Quiz application is mainly required by students and learners to prepare themselves for different examinations directly through Smart-Phones and tablets in hands. The main aim of this project is to facilitate students in learning, gaining and improving their knowledge skills. At the meantime, our app provides them fun so that the users can prepare for interviews, entrance tests or any other corresponding purposes in a fresh mood and can't get bored or frustrated due to the dullness of application. We designed the application to facilitate the users to be able to take short quizzes using portable devices such as smart phones and tablets.

A simple Quiz App that contains a group of curated questions and their answers and checks for the correctness of the solution given by the user. It navigates through the questions using dynamic programming. Development of Android-based Quiz application is especially required by students and learners to organize themselves for various examinations directly through Smart-Phones and tablets in hands. The main aim of this project is to facilitate students in learning, gaining, and improving their knowledge skills. Within the meantime, our app provides them fun so that the users can steel themselves against interviews, entrance tests, or the other corresponding purposes in a very fresh mood and can't get bored or frustrated because of the dullness of the applying. We designed the application to facilitate the users to be able to take short quizzes using portable devices like smart phones and tablets. Android is software that is built basically for Mobile phones. It's supported by the Linux Kernel and other open-source software and is developed by Google. Android is very popular nowadays among students and students are now choosing Android for his or her projects. It's greatly important for a beginner to create baby Android apps to learn Android. The evolution of today's mobile devices increases the quantity of mobile applications developed and among them the quiz applications. Android Mobile hardware and software platforms allow the running of faster and richer applications. This paper presents the

most steps within the development of a quiz application for Android using Android Studio. Android could be a software package and Linux based operating system for mobile devices' equipments such as tablet computers and smartphones. It's developed by Google and later the OHA (Open Handset Alliance). Java language is principally used to write the android code while other languages are used. The goal of the android project is to form a successful real-world product that improves the mobile experience for end-users.

II. OBJECTIVE

The basic objective of this project is to develop an android-based system with following features, namely: (i) Questions bank, (ii) Time frame, (iii) Life lines, (iv) Data Storage, and (v) Multimedia support (pictures, snapshots, tables). The main objective to create this Quiz app is to help the users for the preparation of necessary educational purposes regarding Computer Science and IT field with an easy access to our app directly on their Android phones. Through our app, users can learn and prepare themselves for interviews, tests and exams on Android phones, and can also use this app for increasing their general knowledge about Computer Science, Verbal and Analytical everywhere and anytime.

III. PROBLEM STATEMENT

It is essentially required to assist students for the learning and preparation of different tests conducted for admissions in higher studies. However, there exist no such application in android-based platform, which can provide candidates with both preparation of such tests in user friendly and interactive way. This is what we tried to address in the development of Quiz App : Quiz Application Development using Android-Based Platform.

IV. PROPOSED WORK

Android could be a complete set of software for mobile devices like tablet computers, notebooks, smartphones, electronic book readers, net-top boxes etc. It contains an Android-based Operating System, middleware and key mobile applications.

We are creating the simple example of android using the Android IDE. For creating the simple example :

1. Create the new android project.
2. Write the code and functions for the app in Java.
3. Design the graphics for app in XML.
4. Run the android application.
5. Convert the files into APK bundles.
6. Test the App.
7. Launch on the Smartphone.
8. Can share with other user.
