**A Hypothetical Enhanced Renewable Energy Utilization (EREU) Model for Electricity Generation in Thailand** Thomas Andexer,2008-10-29 Master s Thesis from the year 2008 in the subject Environmental Sciences grade Passed Assumption University of Thailand College of Internet Distance Education CIDE School of Business Administration course Master Thesis Project language English abstract This thesis presents a research project entitled A Hypothetical Enhanced Renewable Energy Utilization EREU Model for Electricity Generation in Thailand This research is motivated by Thailand s rapidly increasing electricity consumption caused by the country s long standing above average economic growth Consequently the rising electricity demand can only be satisfied by continuously growing electricity imports and thus creating a significant burden to Thailand s national budget Further more Thailand is heavily dependent on natural gas reserves for electricity generation however these are expected to be depleted within only three decades and global price levels for conventional fuels are increasingly volatile with an ascending tendency as well Therefore Thailand faces an urgent need to strategically plan for the broad utilization of domestic renewable energy resources which is essential for a more diversified and thus sustainable electricity generation as well as for the nation s endeavor to become an energy hub within the South East Asian region Under these circumstances this research conducts a comprehensive literature review regarding the past development as well as the current situation of renewable energy utilization in Thailand which concludes in the identification of the importance of renewable energy in the given context and closes with both a distinctive need assessment and a conceptual framework for Thailand s future renewable energy strategy Subsequently the research introduces a unique primary research endeavor in the form of an explorative expert interview survey which succeeds in a substantial collection of qualitative and in depth data These valuable data is first objectively analyzed and second subjectively interpreted and summarized to become the major source for the derivation of a multitude of potential strategic recommendations for an enhanced future renewable energy utilization development in Thailand Finally the entirety of theses recommended strategic approaches based on both the secondary and primary research are assembled to develop the Enhanced Renewable Energy Utilization EREU model for electricity generation in Thailand as the fundamental finding of this thesis and research project respectively

**Consumer Behaviour** Leon Schiffman,Aron O'Cass,Angela Paladino,Jamie Carlson,2013-10-15 A trusted resource for Consumer Behaviour theory and practice Consumer Behaviour explores how the examination and application of consumer behaviour is central to the planning development and implementation of effective marketing strategies In a clear and logical fashion the authors explain consumer behaviour theory and practice the use and importance of consumer research and how social and cultural factors influence consumer decision making The sixth edition of this Australian text provides expanded coverage of contemporary topics

*Food Safety and Agro-Environment in China* Dongpo Li,Teruaki

Nanseki,2013-03-06 The prediction of China's rise is the subject of this book. The main ideas of this book are derived from Kanshokufuji a new concept proposed by the chief editor of Prof Nanseki pertaining to a sound food system in a sound agro environment. It implies that food supply and demand are non separable in terms of location due to the importance of retaining the suitable condition of the environment and biodiversity in the region. This concept is necessary and useful for coping with environmental issues and related food safety issues. From this view point several integrated surveys in both rural and urban areas of China were conducted by the food risk research group at the Research Institute for East Asia Environments RIEAE Kyushu University to reveal the current status of the environment food and agriculture in this country. The results of the surveys are introduced in this book along with implications and recommendations. We hope this book be referential for policy makers researchers and industry personnel relating to food agriculture and environment.
