Ancient Greek Purism Olga Tribulato, Federico Favi, Lucia Prauscello, 2024-12-30 This volume is the first of four devoted to Atticism a form of linguistic purism that sought to preserve the rules of the 5th century Attic dialect against the evolution of Postclassical Greek. The series elucidates the origins and development of Atticist thought as well as its impact transmission and legacy from the Byzantine Middle Ages to the Renaissance. Although Atticism flourished in the Imperial age its roots are steeped in the previous centuries. This volume investigates the broad historical cultural and linguistic factors leading to the emergence of Attic as a prestige variety among the classical Greek dialects the way Attic exclusivity was construed in Athenian literary sources and how Hellenistic scholarship contributed to monumentalising Attic supremacy. Atticism can be regarded as the first example of an intellectual movement seeking to promote an extinct variety to the status of linguistic standard reflecting an ideological and nostalgic view of identity. This volume traces the roots of this linguistic phenomenon back to factors at work in the construction of Hellenicity in the archaic and classical periods

Yearbook of Morphology 2000 G.E. Booij, Jaap van Marle, 2013-03-14 A revival of interest in morphology has occurred during recent years. The Yearbook of Morphology series published since 1988 has proven to be an eminent support for this upswing of morphological research since it contains articles on topics which are central in the current theoretical debates which are frequently referred to. The Yearbook of Morphology 2000 focuses on the relation between morphology and syntax. First a number of articles is devoted to the ways in which morphological features can be expressed in the grammar of natural languages both by morphological and syntactic devices. This also raises the more general issue of how we have to conceive of the relation between form and grammatical meaning. Several formalisms for inflectional paradigms are proposed. In addition this volume deals with the demarcation between morphology and syntax to which extent can syntactic principles and generalizations be used for a proper account of the morphology of a language. The languages discussed are Potawatomi, Latin, Greek, Romanian, West Greenlandic and German. A special feature of this volume is a section devoted to the analysis of the morphosyntax of a number of Austronesian languages which are also relevant for deepening our insights into the relation between our morphology and syntax. Audience: Theoretical, descriptive and historical linguists, morphologists, phonologists, computational linguists and psycholinguists will find this book of interest
