### UNIT 1 : The Ancient World

Over the first thousands of years of human existence, people advanced in many different ways. A new era of human development began when humans discovered how to plant crops and domesticate animals. A more settled life and more dependable food sources allowed people to build civilizations with complex political, social, and religious structures. Civilizations began to interact with each other. They shared ideas and technology through such means as trade and conquest.

Classical civilizations arose in Africa, Asia, and Europe. These civilizations made contributions to art, architecture, law, government, and other fields. Their achievements continue to affect society today. Ancient civilizations also made an impact on each other and on today's world through the development of powerful belief systems. These belief systems have spread throughout the world and affected cultural development and the course of history.
