Animals, Equality and Democracy S. O'Sullivan,2015-12-11 Animals Equality and Democracy examines the structure of animal protection legislation and finds that it is deeply inequitable with a tendency to favour those animals the community is most likely to see and engage with Siobhan O Sullivan argues that these inequities violate fundamental principle of justice and transparency Creative Teaching: English in the Early Years and Primary Classroom Chris Horner,Victoria Ryf,2007-06-11 Presenting a range of exciting activities that support the development of creative English lessons within the existing structures of the Foundation Curriculum and the National Curriculum this book is packed full of interactive and creative teaching strategies provides guidance on assessing creative work highlights opportunities for creative literacy activities across the curriculum covers ages 3-11 **Secret Codes 2005** BradyGames (Firm),2005-07 No Marketing Blurb

Wittgenstein on Other Minds Constantine Sandis,2025-03-11 The book brings together Constantine Sandis's essays on Wittgenstein's approach to understanding others. Sandis sketches a picture of how his anti-scepticism with regard to the philosophical problem of other minds is not only compatible with but also supported by his scepticism concerning the real life difficulty of understanding others and being understood by them. While each individual essay focuses on particular issues in Wittgenstein including philosophical anthropology, interpersonal psychology and animal concepts, they collectively paint a picture of what he takes the real problem of other minds to be: how to overcome it and the limitations of our understanding. Sandis not only offers a fresh exegesis of Wittgenstein's public and private writings on these matters but proceeds to show the relevance of Wittgenstein beyond the academy. **Carnivore Minds** G. A. Bradshaw,2017-03-28 Myth and media typically cast animals we consider predators or carnivores as unthinking killers, dangerous, unpredictable and devoid of emotion. But is this portrait valid? By exploring their inner lives, this pioneering book refutes the many misperceptions that hide the true nature of these animals. We discover that great white sharks express tender maternal feelings, rattlesnakes make friends, orcas abide by an ancient moral code and much more. Using the combined lenses of natural history, neuroscience and psychology, G. A. Bradshaw describes how predators share the rainbow of emotions that humans experience, including psychological trauma. Renowned for leading research on post-traumatic stress disorder (PTSD) in elephants and other species, Bradshaw decries the irrational thinking behind wildlife policies that equate killing carnivores with conservation. In its place, she proposes a new ethical approach to coexistence with the planet's fiercest animals.
