Annotation Non Fiction Texts:

Ambiguity and Narratology Simon Grund, Robert Kirstein, Julian Wagner, 2024-10-21 As a well known phenomenon in everyday communication ambiguity has increasingly become the subject of interdisciplinary research in recent years. However, within this context it has been observed that words or expressions situated within the artistic framework of storytelling have not yet been at the centre of research interest. This book aims to bridge this gap by examining the phenomenon of ambiguity from the perspective of narratology understood as a general theory of narration and narrative communication. The volume pursues two goals. Firstly, it seeks to demonstrate that the interdisciplinary combination of linguistics, cultural history, and narratology enriches the field of literary studies significantly. This focus not only highlights how narrative techniques often rely on everyday language conventions but also explores how various textual features, narrative devices, or even entire storylines can be affected by phenomena or lead to experiences of ambiguity. These ambiguities often serve as poetic strategies that are deliberately set in the communicative process of text and reader to achieve certain narrative goals. Secondly, ambiguity as a characteristic of narrative communication serves as a linking element across different fictional and factual text types and genres throughout time and cultures. The collected essays cover a wide range of narrative texts from Roman comedy to funerary reliefs from historiographical writings to utopian tales from Goethe's novels to contemporary fantasy literature. In its broad approach, the volume thus contributes to the project of diachronic narratology, which like the research on ambiguity in literary and cultural studies has recently gained increasing momentum. The combined consideration of ambiguity and narratology not only raises awareness of phenomena of ambiguity in narrative texts but also encourages reflection on the theoretical foundations of narrative, particularly on the methods and devices used to describe these ambiguous structures. Overall, the volume represents an exploration of a relatively unexplored interdisciplinary field aiming to stimulate further research.

Strategies that Work Stephanie Harvey, Anne Goudvis, 2007 Describes strategies teachers can use to promote reading comprehension in students from kindergarten through eighth grade and includes examples of student work, illustrations, and other reference tools.

Nonfiction Strategies That Work Lori G. Wilfong, 2014-04-03 Teachers are being bombarded with ideas for teaching nonfiction, but what really works? In this essential book, dynamic author Lori G. Wilfong describes ten best practices for teaching nonfiction and how to implement them in the classroom. She also points out practices that should be avoided, helping you figure out which strategies to ditch and which to embrace. Topics covered include finding quality, differentiated texts to teach content; selecting support strategies with purpose; providing students with a range of scaffolds for effective summary writing; purposely selecting vocabulary words to support content learning; working with students to develop strategies to cite textual evidence; using text structure as both a reading and writing tool for analyzing nonfiction; and much more. Every chapter begins with an engaging scenario and ends with action steps to help you get started. The book also contains tons of
