manuscripts resisted obsolescence Made by highly specialised craftspeople scribes illuminators book binders with labour
intensive processes using exclusive and sometimes exotic materials parchment made from dozens or hundreds of skins inks
and paints made from prized minerals animals and plants books were expensive and built to last They usually outlived their
owners Rather than discard them when they were superseded book owners found ways to update amend and upcycle books
or book parts These activities accelerated in the fifteenth century Most manuscripts made before 1390 were bespoke and
made for a particular client but those made after 1390 especially books of hours were increasingly made for an open market
in which the producer was not in direct contact with the buyer Increased efficiency led to more generic products which
owners were motivated to personalise It also led to more blank parchment in the book for example the backs of inserted
miniatures and the blanks ends of textual components Book buyers of the late fourteenth and throughout the fifteenth
century still held onto the old connotations of manuscripts that they were custom made luxury items even when the
production had become impersonal Owners consequently purchased books made for an open market and then personalised
them filling in the blank spaces and even adding more components later This would give them an affordable product but one
that still smacked of luxury and met their individual needs They kept older books in circulation by amending them attached
items to generic books to make them more relevant and valuable and added new prayers with escalating indulgences as the
culture of salvation shifted Rudy considers ways in which book owners adjusted the contents of their books from the simplest
add a marginal note sew in a curtain to the most complex take the book apart embellish the components with painted
decoration add more quires of parchment By making sometimes extreme adjustments book owners kept their books
fashionable and emotionally relevant This study explores the intersection of codicology and human desire Rudy shows how
increased modularisation of book making led to more standardisation but also to more opportunities for personalisation She
asks What properties did parchment manuscripts have that printed books lacked What are the interrelationships among
technology efficiency skill loss and standardisation **Economische groei en levensstandaard** Yves Segers,2003
