

Problem A part made of ANSI 1030 cold drawn steel has an ultimate tensile strength of 76 ksi and a yield strength of 64 ksi. The part is a round shaft with a diameter of 0.90 inches and does not rotate. Estimate the life of the part if it is tested at a completely reversed bending stress amplitude of 28 ksi. The conditions of testing are at room temperature.

1. Solve for the uncorrected endurance limit, S'_e .

$$S'_e = \begin{cases} 0.5S_{ut}; & S_{ut} \leq 200 \text{ ksi (1400 MPa)} \\ 100 \text{ ksi (700 MPa)}; & S_{ut} > 200 \text{ ksi (1400 MPa)} \end{cases}$$

2. Solve for the surface condition factor, k_a .

Etter, 1995-11-01 PC/Computing, 1994-07 Computer Programs in BASIC Paul Friedman, 1981 Structured and Object-oriented Problem Solving Using C++ Andrew C. Staugaard, 2002 Welcome to the third edition of my C text The highly successful first edition was one of the first textbooks available for teaching C in the first programming course The text was introduced at the 1994 ACM Conference in Phoenix when many were arguing the virtues of teaching C and OOP versus Pascal and structured programming in the first programming course I argued at the time and still argue that students need to be taught problem solving early on using both the structured and object oriented paradigms and because of its hybrid nature C is the only language suited to learning both of these paradigms Since then many institutions have made the switch from Pascal to C for just this reason as well as the intense industry support for C language As a result this third edition continues to provide an introduction to both structured and object oriented problem solving techniques using the C language Of course many improvements have been made based on using the text in numerous classrooms all over the world since 1994 As with earlier editions the text starts from the beginning assuming no previous knowledge of C or any other programming language This text is appropriate for any introductory programming CS1 course using the C language as well as experienced programmers wanting an introduction to structured and object oriented problem solving techniques using the C language
