

5. The students' vehicle choices will vary. Again, make sure that they are readily available to the students at a reasonable price. Also, be sure that the students' vehicles are compatible with their choice of track.
6. This measurement will vary, depending on the student's vehicle. Students may need help measuring the mass of their vehicles.
7. Make sure that students draw their sketches to scale. The scale that they use should be clearly indicated on their sketches.
8. Heights of hills and distances between hills should conform to the scale that the student selected. The point of maximum potential energy is at the top of the first hill. The point of maximum kinetic energy is at the bottom of the first hill.

Chapter 5 Project Worksheet 2 (p. 119)

Part I

Make sure that students keep thorough records of their modifications.

1. If the second hill is shorter, the vehicle will travel further up the third hill.
2. The answer to this question will vary depending on the type of track that the student has designed.
3. The students' answers will vary depending on the track, vehicle choices, and the distances between hills.

Part II

Make sure that students keep thorough records of their modifications.

4. The answer to this question will vary depending on the type of track that the student has designed.
5. It is likely that the student will need to change the heights of the hills to include additional features.
6. The answer to this question will vary depending on the type of track that the student has designed.

Section 5-1 Review and Reinforce (p. 123)

1. Work is the transfer of energy.
2. Kinetic energy is the energy of a moving object. Potential energy is energy stored and held in readiness.
